

*Evidence-Based Decision Making
in Local Criminal Justice Systems*

**Phase III Application of
The Milwaukee Collaborative**

MILWAUKEE

Benedict Center

Compassion • Justice • Mercy • Transformation

“In Milwaukee, we’re used to such skepticism and we’ve seen so much ‘I know better’ posturing, but since we started collaborating on this EBDM project what I’ve seen is thoughtful engagement and true dialogue.”

– Kit McNally, a community member of the EBDM Policy Team

Milwaukee County Community Justice Council

Working to improve safety and the quality of life in Milwaukee County

June 20, 2011

Morris Thigpen
Director, National Institute of Corrections

Dear Mr. Thigpen:

I am writing to express our Council's strong interest in being considered for phase III of the Evidence-Based Decision Making in Local Criminal Justice Systems initiative. We have learned quite a bit since starting this process last fall about ourselves and what it means to apply the EB framework to a criminal justice system in a relatively large urban setting. We have been challenged to examine each part of our system and I believe we are ready to take our efforts to the next level.

Already we have started to implement a key component of a major change in how we assess risk, measure harm reduction and ensure community safety. Universal screening of persons arrested and brought to jail will provide an evidence-based risk and needs assessment report to judicial officers charged with setting bail and conditions of pre-trial monitoring.

This program along with our other prioritized initiatives show great potential not only for us but for other jurisdictions as well. A key component of the NIC initiative as I understand is the ability to replicate lessons learned across other jurisdictions, especially urban settings most challenged by the current economic circumstances. I assure you that we are fully committed to opening up our system to anyone who wants to come observe, measure and learn from our successes and challenges.

Ten years ago Milwaukee was the recipient of a federal grant to challenge the notion that judicial oversight of domestic violence cases would result in greater offender accountability and victim safety. Twin goals that, are inherent to this NIC initiative as well. We were one of four sites chosen to participate. Milwaukee's project was clearly the most successful and the one most often replicated. Several of our judges, me included, are part of a national faculty for the National Council of Juvenile and Family Court Judges and the Family Violence Prevention Fund that has taught the lessons learned to several thousand judges from around the country. We will be happy to the same with this project.

We will, of course, cooperate and participate in any evaluation component that NIC might wish to fund. Separate and apart we will need to evaluate for ourselves the efficacy of any changes we make to our system. We have to do more to convince the public and our government funders, (legislators, governor, county board, county executive) than just telling them a process is safe and cost effective, we have to show them.

As a Council we are engaged in making major changes in how we operate our criminal justice

Milwaukee County Community Justice Council

Working to improve safety and the quality of life in Milwaukee County

system, changes that are evidence based and are the result of input from all concerned. We are full committed to this path and hope our attached submission will allow us to continue this course with the NIC's assistance and support.

Thank you,

Jeffrey A. Klemers

Chief Judge Milwaukee County

Chair of the Council's Executive Committee

The Milwaukee Collaborative

Milwaukee will bring to Phase III an established practice of collaboration that has flourished as we strived to meet the challenges of Phase II.

The evolution of the Milwaukee Collaborative

The team that offers this application for your consideration is an expanded and experienced second generation of a criminal justice collaborative that has been at work in Milwaukee improving criminal justice since 2006. Our collaborative has its roots in the suggestion of an NIC assessment team invited to Milwaukee by Sheriff David Clarke in 2006, which led to the founding in 2008 of our CJC, the Milwaukee County Community Justice Council.¹ In our CJC bylaws, we make an explicit commitment to collaboration.

As you can see, what began as a basic collaborative and then formed into the executive committee of our CJC has expanded significantly and become the EBDMI policy team. (The policy team we proposed when we first applied for this grant is the policy team

¹ A glossary spelling out the acronyms used throughout this application may be found in Appendix A.

still at the helm, but with the additional members listed above.) We started with a diverse, knowledgeable circle of chief policymakers, but as we needed to learn the working parts of each other's operations and our collective capacity for change, we tapped the first-hand expertise of our agency staffs. In all we recruited more than three dozen individuals, from many levels of our organizations. A few joined us at the policy team level; most worked within one of our seven work groups, which were constituted around one or more of the key decision points in the criminal justice continuum. Agency chiefs now work side by side with the rank and file of both their own and other agencies. And to this mix we added the outside perspectives of service providers, nonprofits and community members.

As a result, the teams working on the EBDM initiative are not made up of the usual crowd working in the normal channels. The membership of the sentencing work group, for example, included some obvious choices – a judge, an ADA and a defense lawyer – but also a victim/witness advocate, a sheriff's deputy and a clinical law professor who works with prison inmates. The pre-arrest work group, meanwhile, included not only police officers but also forensic psychiatrists as well as the executive director of a non-profit law firm representing persons with disabilities. The mix of disciplines and the fresh perspectives and experienced observations of these additional collaborators made for a much more insightful and creative planning process.

We collaborated on a grand scale in December, 2010 and May, 2011 in two day-long, system-wide trainings in evidence-based practices. More than 150 colleagues – prosecutors, defense attorneys, judges, commissioners, victim/witness advocates, pretrial service providers, probation agents, law enforcement, elected officials and others – gathered to hear about the state of the art in the field and exchange views on how to incorporate EBPs into a variety of criminal court and corrections practices in Milwaukee. The Chief Judge closed the courthouse to all but a few operations so that professionals throughout the system could

attend, and agency chiefs made attendance a priority. The presentations took place in a specially equipped classroom at Marquette University Law School which made everyone in the audience a participant in the highly interactive presentations.

At the end of the sessions, participants began speaking in one voice in support of integrating EBDM into our system protocols. The evaluation of the May session indicated that 64% of respondents now feel very knowledgeable about EBPs and the potential system impact, compared with 27% beforehand. Further, 84% said they were clear about the purpose and potential of the EBDM initiative and 90% *indicated a desire for more information on EBDMI and their agency's involvement.*

Collaborative Strengths and Challenges in Phase II

To achieve true collaboration, we needed to confront and overcome two inherent divides among our stakeholders. First, we confronted the natural divide that grows out of the adversary system. Reforming criminal justice depends on bringing together prosecutors and defense counsel, but the adversary system tends to pit them against one another. In Milwaukee, however, we are fortunate to have leaders in both these camps who are like-minded on the question of making policy based on research and data. (*See the letters of support of DA John Chisholm and First Assistant SPD Thomas Reed, at App 109, 122.*) So, to spearhead our efforts in Phase II, we strategically chose to recruit coordinators from each camp, Paige Styler, a veteran in the SPD office, and Jeffrey Altenburg, a high ranking deputy in the DA's office. And they came prepared to lead a collaborative effort, having teamed up previously to develop and lead our current diversion/deferred prosecution program.

Our second major challenge, one certainly not unique to Milwaukee, was the political tension between advocates of risk assessment and offender treatment and those who perceive those strategies as "soft on crime." This tension was a bit more acute during Phase

II because Sheriff Clarke faced re-election. Some within the Sheriff's political base are skeptical of ambitions such as NIC's, and the Sheriff's skepticism for other innovations in the corrections field might be construed as hostile to the particular aims of this initiative.

But this tension did not stymie us; to the contrary, it spurred us to work even harder at collaboration, to which Sheriff Clarke is committed also. His letter of support (*see App. 111*) demonstrates his commitment. Further, in administering his office, he subscribes to the same fiscal stewardship, cost-effectiveness and data-driven management virtues to which the rest of the collaborative subscribes. And throughout Phase II he and his command staff have collaborated with others in the system to address mutual challenges, even when it has required his office to shoulder additional financial burdens, one example of which is discussed at page 6. In accord with our communications strategy (*see page 18-19*), we need to be especially mindful of those in our community for whom law and order is a singular priority, and we need to be particularly deliberate in demonstrating for them how EBDM ensures sound decision-making about public safety. Having Sheriff Clarke as a collaborator will help us do so.

Our collaborative is even more cohesive now than when we began, as became evident when the policy team met to narrow more than a dozen proposals offered by the work groups to the four we are submitting to NIC. We worked by consensus. Each policy team member cast votes for his or her top three choices. Although hard work and high ambitions were invested in each proposal, it was clear from the vote tallies that policy team members put aside parochial preferences and pledged their support for the four proposals that promise the best results for the system as a whole.

Collaboratively Engaging Phase III

In Phase III we intend to build on the collaborative momentum we developed in

Phase II. The current policy team will continue for the foreseeable future to manage the work of Phase III. Although Phase III will entail considerable effort among agency staffers and outside consultants, many of the planning and preparatory tasks, as our work plans illustrate, will need to be done up front by policy team colleagues.

We already are planning ways to expand our collaborative to bring additional expertise to the tasks that lay ahead of us. We have identified Phase III tasks in each of the project areas that will require us to enlist accountants, information technologists, social service providers, evaluators, researchers and others. These experts will help us establish baseline data, develop reliable methodologies for judging the harm reduction measures we discuss below, review and upgrade our programming to ensure that it is evidence-based, and assess our fidelity to our work plans and the potential for them to be replicated.

Our collaborative is so committed to our proposals that we fully intend to pursue them even if another seed site offers NIC a superior plan for demonstrating EBDM in a major metropolitan criminal justice system. Of course, we do not underestimate our need for technical assistance – especially in helping us learn more about EBDM principles that we are just beginning to put into practice and in developing our data capture strategies, but also in simply keeping us focused on our vision – and we are eager to be selected.

The Lessons of Phase II

The lessons we have learned in Phase II make us confident that Milwaukee can serve as an example to the nation of the potential of EBDM in criminal justice:

(1) We've demonstrated to ourselves what we can accomplish when we collaborate. In Phase II, we surprised ourselves by resolving issues that had stubbornly divided us. The policy team's commitment to results that are best for the system as a whole – even when the solution to one agency's issue might require another to shoulder additional

burdens – made a demonstrable difference. For example, our routine practice of shuttling inmates between our downtown and suburban jail facilities in an effort to manage population limits complicates a variety of pretrial functions which require the defendant’s presence downtown. This practice has been questioned often, but when stakeholders across the system gathered and laid the map of the transport process alongside the map of the intake and plea negotiation process, and considered data showing that inmate movement was causing court delays resulting in longer jail stays, the impediments became obvious and the Sheriff’s Office got right to work on a solution.

(2) True collaboration can’t proceed until the collaborators know what’s going on outside their own silo (and inside as well). We labored long and hard mapping our system and the effort is paying dividends, as our colleagues help us discover how anomalies within the process can skew results across the system. For example, by mapping the arrest-to-booking process, we could see that many defendants arrested in the suburbs got to court without being booked and detained downtown at all. This led the Milwaukee Police Department to consider booking arrestees and taking bail at district stations and commit to a pilot project to test the idea. This pilot holds serious potential for reducing both unnecessary pretrial confinement and its substantial costs.

(3) True change is possible when EDBM principles are put to work. During Phase II we not only learned about EDBM, we put it to work, and in doing so we demonstrated that we need not be stuck doing things as we always have, on the assumption that it’s the best we can do. Systematic review of policy and practice, systemwide agreement to a set of principles and outcomes, and consulting research and data can make for true change:

For a year before we began work on Phase II, SPD lawyers had been trying to convince the DA’s office to divert certain low-level cases from the system altogether, rather

than handling them as deferred prosecutions, which entails more court proceedings and exposes the offender to greater potential punishment. The cases that were the focus of these efforts were solicitation and prostitution cases in which the defendant had no criminal record or a limited criminal record.

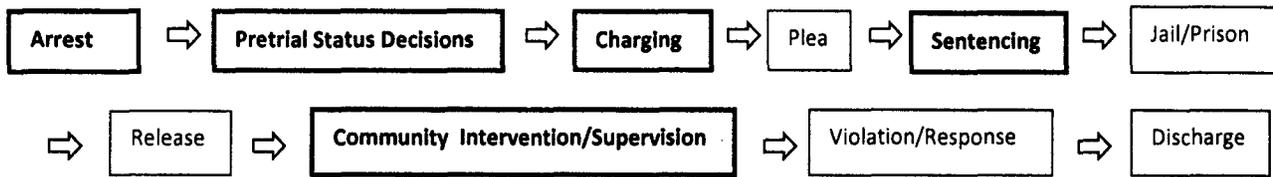

After we began work on Phase II, both sides approached this problem in a completely different way. The SPD lawyers convened a work group to gather data about risk, recidivism and past successes and failures. Then the parties met again. They saw evidence, just not anecdotal stories, about the limited harm this group of offenders presents, which might make them suitable for diversion altogether rather than merely deferred prosecution. As a result, the DA's office agreed to pilot a diversion program for these offenders.

(3) *Be true to the logic model.* What might seem at first like just a compulsory exercise could turn out to be the medal competition. The logic model, approached with integrity, encourages its developers to stretch their imagination and be accountable to their vision. For us, the logic model forced us to think harder and to be more specific about the results for which we will be required to answer and about how to measure them. It denied us the option of settling for platitudes or unquantified commitments.

Phase III Implementation Plan

The mission of our collaborative is greater accountability in the criminal justice system and better stewardship of our criminal justice resources by putting into practice what data and research tell us actually works. It is in pursuit of this mission that we intend to implement **four specific, measurable harm reduction projects that will yield the outcomes spelled out in the scorecard featured on page 13.** Our projects will

be instituted at five points along the continuum of key decision points, highlighted here:

Each of our four projects is founded firmly on research, best practices and principles embraced by the *Framework for EBDM in Local Criminal Justice Systems*. One tenet of the Framework is paramount in each of our proposals: in assessing an offender’s risk of reoffense and criminogenic needs, and in matching offenders with the appropriate supervision, treatment and jail resources, systems like ours should employ instruments built on actuarial data, as opposed to professional judgment alone. Smith, Gendreau, *et al.* (2009), Bonta, Andrews, *et al.* (2006); Gendreau, Little, *et al.* (1996).

Detailed work plans for each of our four projects, demonstrating how we will plan, implement, evaluate and publicize the results of each of them, are found in Appendix E.

1. Sharing and Using Richer Data about Detainees with Mental Illness

Through a structured program of Crisis Intervention Team (“CIT”) training over the past six years, the Milwaukee Police Department has begun to equip police officers to respond effectively in situations involving individuals with mental health conditions. We propose to expand and build on this experience in four ways: (1) expand the program so that at least one-quarter of all MPD officers are CIT-trained (currently, about 18% of officers are so trained); (2) enhance the program by training dispatchers and booking officers to collect mental health information and by linking CIT information to the jail booking process through a specially trained CIP (Crisis Intervention Partners) staff; (3) strengthen the network of those with CIT training so that the critical information they acquire about any given encounter is communicated down the line to decision-makers including jail managers,

booking officers, prosecutors, defense attorneys and judicial officers in critical decision making about classification, charging, bail and diversions and deferred prosecution; and (4) through a Chronic Consumer Stabilization Initiative, identify those individuals with mental illness who account for the majority of police calls for service within a police district and link them to individual officers tracking their progress in the community.

By integrating these three modalities – CIT, CCSI and CIP – we will greatly improve outcomes for individuals in our system with mental illness. As soon as possible after a person with mental illness who needs special treatment enters the system, those needs will be accurately identified, and then at each of the key decision points in the process the decision makers will have the best available information about him or her. These programs have been proven nationwide to preserve the health of those who come into contact with the criminal justice system, while at the same time increasing officer and community safety. Compton, Bahora, *et al.* (2008).

2. Using Risk/Needs Information to Pinpoint Cases for Diversion or Deferred Prosecution

The key to an effective strategy for diverting or deferring prosecution of certain cases is knowing which cases are suitable for this expedited handling and which cases are not. Knowing whose behavior can be changed without subjecting them to a full dose of the criminal justice system allows us to judiciously reserve those resources for those who commit or are at the greatest risk to commit more serious crimes.

Since 2007, Milwaukee has had a structured program for diverting cases and deferring prosecution (“Div/DPA”). Although the program is generally effective, with almost 600 cases diverted or deferred every year, and a success rate of about 70%, it can be expanded significantly and achieve even better results. In Phase II, we reviewed our Div/DPA program. We concluded that we have not implemented the program as

systematically as we can, nor have we focused on offenders upon whom we might leverage the greatest benefit for the community. We believe we can be more selective about the participants, provide programming and incentives that are better tailored to individual criminogenic needs and avoid prescribing services to low-risk offenders.

Relying principally upon research demonstrating the utility of risk/needs assessment and case management planning (*see* page 8), we will give our Div/DPA program this systematic, clear focus by (1) admitting offenders to the program only after assessing their risks and needs, using two separate assessment tools (the MCPRAI to measure pretrial risk and needs and LSI or COMPAS to measure risks and needs in the long term²) and then negotiating the terms of the Div/DPA agreements accordingly; (2) evaluating the programming we currently offer to ensure that it is evidence-based and suited to the needs we anticipate, and creating a menu of treatment/intervention options for everyone in the system who will be negotiating and approving these arrangements; and (3) creating a matrix of EBP incentives and sanctions to promote compliance. *See, e.g.,* Andrews & Janes (2006); Tonry (1996).

3. More Rigorous Risk-Needs Management of the Pretrial Population

At most bail hearings in Milwaukee, two pieces of information dominate: the current charge and the defendant's criminal history. Bail decisions tend to be *ad hoc* and driven by intuition and unanchored professional judgment. We have not put fully to work the copious research (*see* page 8) and best practices developed in other jurisdictions about other factors that should be considered in determining a defendant's risk of pretrial misconduct.³

² We are currently transitioning from the LSI-R, which we have used for a number of years in a special felony sentencing program known as AIM, to COMPAS, which DOC will roll out in October, 2011.

³ We are experienced in applying risk assessment research, although on a limited basis, as a result of a small jail-screening operation funded through Wisconsin's TAD program that supports our current Div/DPA operation.

Putting this research to work, we will (1) deploy trained screeners in the jail to screen all persons arrested for an offense for which a bail decision must be made, using an actuarial instrument we have developed and are validating for use here (the MCPRAI); (2) institute risk/needs-driven, presumptive bail conditions – contained in a grid known as a “Praxis,” which we recently devised under the tutelage of Dr. Van Nostrand – which correspond to risks of pretrial misconduct and failure to appear and particular criminogenic needs, and track our performance to ensure consistency; (3) spare low-risk defendants confinement and bail conditions which should be reserved for higher-risk defendants; and (4) compile, analyze and report data about the pretrial population to ensure that we are maximizing the benefits of our various pretrial supervision and detention options.

4. Better Stewardship of Probation Resources by Managing Dosage, Not Merely Duration

Sometimes the principal goal of probation is to contain a known risk over a given period of time. In most cases, however, the principal goal is risk reduction. Unfortunately, we don’t often structure probation around that goal, but instead we tie probation to the offender’s ability to remain trouble-free throughout a certain period of time.

There is a growing body of research that likens probation services to medicine and predicts that after a certain dosage, further services and supervision are unnecessary. (Gendreau and Goggin, (1996); Bourgon and Armstrong (2005); Latessa & Sperber, forthcoming). This research complements the large body of research cited in the Framework demonstrating that behavior change-oriented supervision is more effective in reducing recidivism than surveillance-oriented supervision. The dosage research suggests, for example, that for an offender who presents a medium-high risk of reoffense, 200 hours of appropriate services at a sufficient intensity level will suffice to reduce the offender’s risk.

If early termination of probation is offered, both the offender and the probation department are incentivized to reach the dosage level as soon as possible.

We intend to put this research to work in a pilot program in which probationers will be permitted to earn early termination of probation by accomplishing risk-reducing objectives. We will (1) invite an independent evaluator to ascertain how closely the risk reduction programming available to probationers in Milwaukee meets EBPs and principles of effective intervention (as DOC already does with many of its programs, under a contract with Dr. Ed Latessa and the University of Cincinnati); (2) develop a profile of the kind of medium- to high-risk offender who might be most effectively treated by such programming; (3) assess defendants in the target population with a COMPAS instrument; (4) randomly select 150 offenders who meet the profile and assign them to agents specially trained to manage and administer the required dosage of services; and (5) track the target group, as well as other probationers who meet the profile but were not selected, and compare results.

Priorities, Capacities and Community Commitment

In accord with the page limits suggested in the application kit, our discussion of how we selected the four projects we propose here, our capacities to take them on, and our strategies for enrolling our community may be found in the “Additional Considerations” section beginning on page 17.

Our Scorecard and Dashboard

On the following two pages we show the two devices we will use to communicate our progress to our constituents, to hold ourselves accountable and to keep our collaborative focused on the short- and long-term indicators of progress.

The first is a scorecard that will be shared with the public – indeed, touted – to show our progress on our four harm reduction goals, and to ensure accountability.

Evidence-Based Decision Making Initiative

System Scorecard

Four Commitments We Make to Criminal Justice in Milwaukee

The Milwaukee County Criminal Justice Council, a collaboration of all stakeholders in Milwaukee's justice system, is firmly committed to greater accountability in criminal justice and better stewardship of criminal justice resources.

To make this vision a reality, we are implementing **Four Systemic Changes** with the assistance of the National Institute of Corrections and the Bureau of Justice Assistance.

By applying what research and data tell us about what works in protecting the community, holding offenders accountable and making the smartest possible use of our limited resources, by the end of 2013 we will:

1. **Reduce by 25% the number of people with mental health needs who lose their benefits due to being jailed or losing housing, and increase by 25% the number of individuals with mental health needs who are reconnected to the services they need within 20 days after arrest.**
2. **Safely release and/or supervise 15% more pretrial detainees in the community rather than in jail, generating at least \$1,000,000 in savings that can be reinvested in the community, and at the same time reduce by at least 40% the already low rates at which defendants waiting for trial fail to follow pretrial rules.**
3. **Divert or defer prosecution in 10% more cases than we do currently, holding offenders accountable, compensating victims and reducing recidivism, while generating at least \$350,000 in savings that can be reinvested in the community.**
4. **Demonstrate in a pilot project that by terminating probation as soon as an offender in need of treatment has received sufficient treatment, we can cut the cost of probation by at least 50% and at the same time reduce probation recidivism by 50%.**

EBDM Initiative

Monthly Project Dashboard

Measures of Progress:

CIT/CCSI/CIP	Baseline:	Goal:	Current Progress:
Percentage of MPD Officers with CIT Training:	18%	25%	
Percentage of Chronic Consumers identified:	0%	100%	
EDs for CCs:			
Aggregate cost of EDs for CCs:			
Number of CCs in Special Needs Pod:			
Aggregate cost of housing CCs in Special Needs Pod:			

Universal Screening	Baseline:	Goal:	Current Progress:
Percentage of defendants considered for bail who are screened:	0%	100%	
Percentage of cases in which bail = Praxis recommendation:	0%	85%

Rearrest rate:			

Diverslon/DPA	Baseline:	Goal:	Current Progress:
Diversions/DPAs screened annually:			
Diversions approved annually:	119	130	
Diversions successfully completed annually:	84	100	
DPAs approved annually:	456	500	
DPAs successfully completed annually:	320	385	
Jail bed days avoided by successful diversion:			
Jail bed days avoided by successful DPAs:			
Arrests resulting in new charges during diversion period:	2.8%		
Arrests resulting in new charges during DPA period:	5.9%		

Dosage Probation	Goal:	Current Progress:
Number of offenders serving sentence with Dosage Pro condition	150	
Number of offenders in control group	150	
Number of offenders scheduled for low dose		
Number of offenders scheduled for medium dose		
Number of offenders scheduled for high dose		
Number of Dosage Probations successfully discharged	112	
Number of control group probations successfully discharged	No goal	
Average length of discharged Dosage Probations	50% of control group	
Average length of discharged control group probations	No goal	
Number of Dosage Probations revoked	50% of control group	
Number of control group probations revoked	No goal	
Number of Dosage Probationers arrested on new charges	50% of control group	
Number of control group probationers arrested on new charges	No goal	

The second is a dashboard of the key short-term indicators drawn from the work plans and logic model. It is intended as a structured managerial tool which will be used regularly by the policy team, stakeholders and staff.

These documents are not finished products but depict what these devices might look like once a data system has been fully developed to capture the needed information.

The design of these devices is, admittedly, tentative. As our work plans demonstrate, we are building data collection protocols to identify baseline conditions, track our progress in implementing our proposals, and demonstrate the success we hope to achieve. We must acknowledge that in a number of areas we do not yet collect all the data we need to measure and prove the performance of our proposals. For example, we do not yet have reliable data or a data collection system to track the fate of persons with chronic mental illnesses who seem to cycle through our jail, who are the focus of one of our work plans. Likewise, pinpointing the costs of a variety of current functions, like the cost of revoking supervision, is elusive and not supported by existing data collection efforts.

In developing a scorecard and dashboard, we have learned to delve deeply into how we currently collect and use data; how to broaden the available data to support our efforts to achieve harm reduction goals; how best to create a platform to share data to inform policymaking; and how to link the new data systems to what evidence demonstrates is effective. The deeper we have drilled into our internal processes, the more we have discovered that our need to consult data cannot be met without first building improved data collection systems. Hence, a distinctive feature of each of our work plans and our comprehensive logic model is developing the data capture strategies needed to specify the baseline and progress features of the scorecard and dashboard.

Our previous experience as collaborators makes us confident that we can build these data systems, in particular our experience bridging data systems of agencies who collaborate

with us. For example, after many years of collaborative effort between the Sheriff's Office and MPD, arrest data collected by MPD is now entered into a database that is shared with MCSO in a virtual single booking system, which also can provide needed information to others like pretrial service agencies and counsel. We have systems in place to replicate this success. Our CJC maintains a standing Data and Information System Committee; IT managers of several county, city and state agencies serve on it. These agencies have committed their resources to the EBDM initiative. Further, participation in JRI and the assistance it offers will provide us the opportunity to refine data collection to support reinvestment initiatives.

Foundational to achieving our harm reduction goals is to develop the data collection and reporting system which will support the scorecard and dashboard. Our experience with the EBDMI has conditioned us to insist that policy formation and implementation be grounded in data and demonstrate fidelity to evidence. The strength of our commitment fuels our belief that we can overcome the data gaps we have identified.

Five tenets will govern the development of these systems. First, data must be collected in a format that allows its use by others outside the collecting agency. Our work plan for data has action steps designed to inventory existing data sources from all EBDMI partners and assess its transferability. A preliminary review of this material reassures us that a substantial amount of information will be available in a usable form. Second, the data sources currently available must be analyzed to determine which are most powerful in their ability to guide decision making. Third, we will install as a regular feature of our CJC executive committee monthly meetings a collaborative review of available data, and we will update and present the dashboard any time the executive committee meets. Fourth, we will work to create a robust feedback loop so that as data analysis occurs it is converted into actions that can be further measured or refined into questions to be posed to data sources.

Fifth, data collection and analysis must be guided by what evidence has demonstrated to be effective.

Additional Considerations

In addition to the factors addressed above, we believe four items merit consideration in judging our application:

(1) *We will have the capacity we need to implement the projects we propose.* Milwaukee will have the capacity to undertake these projects immediately upon NIC's selection decision. Indeed, we already have begun the work needed to implement these ideas. For example, we already have gathered and begun training our teams in the two training sessions described on pages 2-3, and we are emboldened by the very positive, system-wide response. Dr. Van Nostrand already has helped us develop the Praxis described on page 11. In partnership with our technical assistance advisor, we already have sought grant funding for the training and evaluation components of our dosage probation proposal. And finally the CJC and JRI are already at work identifying data we will need for our projects and devising ways of collecting, converting and distributing data monthly.

There are aspects of each of our proposals that will require support beyond what NIC will provide to those sites which are selected. We are confident that we can make the case for funding where needed. Milwaukee's mayor and Milwaukee County's chief executive, who are responsible for our region's two largest public sector budgets, are full partners in this initiative and fully support bringing EBDM to Milwaukee. (*See the letters of support of County Executive Chris Abele and Mayor Tom Barrett, at App 102, 105.*) Furthermore, stifling budget constraints have not prevented us from finding the funds to begin implementing the proposals we offer here. Our phase-in of universal screening will begin next month. And in the fall of this year we will roll out the Praxis we developed after retaining Dr. Van Nostrand as our consultant. We believe our willingness to put EBDM

principles to work even before Phase III begins, to engage specialists in our planning process and to put our financial resources behind these ventures demonstrates the seriousness of our purpose and the strength of our commitment to EBDM in Milwaukee.

(2) We are already deploying a strong communications strategy for engaging the community in our harm reduction goals and action steps. One very important measure of the health of any community is the public's sense of safety. Our sense of safety is often measured in terms of the crime rate, but the community's subjective perception of its safety may be more salient. Our challenge as we move forward with EBDM in our system is to demonstrate progress both in reducing crime and enhancing community perceptions that its streets are safe. In each of our work plans you will see that we assign detailed responsibilities for engaging the public in our work.

In all our communications, we intend to spread our message: Our commitment to the discipline of EBDM will enable us to hold offenders accountable, reduce the overall crime rate and recidivism, and give taxpayers a better return on the dollars they invest in criminal justice.

The Public Policy Forum, a local nonpartisan think tank, recently conducted a survey on public perceptions about crime and the criminal justice system. It provides us with a ready baseline to measure our progress. We will follow a strategy that reaches the media, citizens, educators, business executives, elected officials, law enforcement, and other justice system partners. Since no single strategy will reach all, it must be flexible, responsive and multi-faceted. In our current environment, perceptions are too often driven by anecdotal crime stories; great for sound bites but not for sound policy.

Our communication strategy is already being implemented. We are already establishing a network of the public information officers who work for the organizations in

our collaborative. In addition, our CJC operates a standing Public Outreach and Education committee. Our CJC operates its own website, milwaukee.gov/cjc, which will give us a prominent place to publish our scorecard and regularly update the public. We plan to enhance the website to enable users to extract data about our performance for purposes of evaluation and further innovation. These resources enable us to get our message out quickly and accurately, proactively contacting large and small media outlets, at the editorial page level and through individual reporters.

In addition, our collaborators are becoming more visible in the community, attending citizen meetings, law enforcement gatherings and civic sessions, and talking about our commitment to EBDM. Just last week, the CJC Public Outreach and Education committee sponsored a presentation at a MPD District Community Crime Meeting to build community support for the CJC and EBDMI projects. Over the course of Phase II, we have taken opportunities as they presented themselves to speak out and publish our commitment to this initiative. For example, DA John Chisholm delivered a major policy address on the virtues of EBDM at Marquette Law School, an excerpt from which was published in the *Milwaukee Journal Sentinel*. Three members of the Policy Team authored an op ed piece also published in the *Journal Sentinel*. Judge Sankovitz authored an article for inclusion in the *MBA Messenger*, the magazine of the Milwaukee Bar Association, and another article in the quarterly newsletter delivered to all state court employees across the state.

We expect that our scorecard will be featured prominently in all communications.

(3) *The four projects we propose are the best of the best.* Our four projects were selected from more than a dozen others as a result of the discernment process described on page 4. We developed a tool to help us rate each of the proposals according to, among other factors, feasibility, novelty, how integrally the proposal tied to our vision

statement and how conducive to measurement our performance would be. (A copy of the tool we used may be found at Appendix C, App. 131.)

(4) We have a strong commitment to reinvesting savings generated by our work. Our pursuit of a Phase I JRI grant, and our success in being selected, demonstrates our enthusiasm and commitment to reinvesting harm reduction savings in additional evidence-based justice system improvements.

Conclusion

We have embraced the Framework principles that “we can improve outcomes if criminal justice decisions are informed by research,” and that “risk and harm reduction are fundamental goals of the justice system.” We have spent the last year going back to school to determine how to rebuild our system to better use evidence in our decisions to achieve specific and measurable harm reduction goals. We are excited and humbled by the scope of the changes we are committed to making, but are convinced of “the new opportunities recent research offers regarding clear and specific strategies that will reduce crime, ease rising costs, and most importantly, prevent future victims.”

Thank you for considering our application.

Appendix A – Glossary of Acronyms

ADA	Assistant District Attorney
ADP	Average daily (jail) population
ALJ	Administrative Law Judge
ALOS	Average length of stay (jail)
BHD	Milwaukee County Department of Health & Human Services Behavioral Health Division

OFFICE OF THE COUNTY EXECUTIVE

Milwaukee County

CHRIS ABELE • COUNTY EXECUTIVE

June 22, 2011

Morris Thigpen
Director
National Institute of Corrections
320 First Street
Washington, D.C. 20534

Dear Mr. Thigpen:

I am writing in support of the Milwaukee County Community Justice Council's application for phase III of the Evidence-Based Decision Making Initiative.

I am proud to say that we have built a wonderful coalition of stakeholders who are advocates for evidence-based decision making in our criminal justice system. In the eleven months since we applied for phase II of the initiative, we have learned a great deal about inherent - and sometimes inaccurate - assumptions in our system, in addition to needed changes such as public awareness of the value of evidence-based decision making. Implementing a public education strategy that demonstrates our commitment to public safety and begins to reshape perceptions is paramount to the ultimate success of our shift to evidence-based decision making.

Through participation in phase II we have been able to identify critical decision points to make our system more responsive. I am confident that we can make better policy decisions while shepherding in a higher degree of safety in a cost efficient manner by continuing with phase III of the Evidence-Based Decision Making Initiative.

The County Executive's office will continue to take an active role in furthering this exciting move to evidence-based decision making in Milwaukee County. For these reasons, I enthusiastically offer my support for the Community Justice Council's application and thank you for your consideration.

Sincerely,

A handwritten signature in black ink, appearing to read "Chris Abele", written over a horizontal line.

Re: EBDMI Grant Phase III Application

Dear Mr. Thigpen:

I am writing in support of Milwaukee County Community Justice Council's application for Phase III of the Evidence-Based Decision Making Initiative ("EBDMI").

As a prosecutor in the Milwaukee County District Attorney's Office ("MCDAO") for over 14 years, I can honestly say that Milwaukee County's participation in EBDMI has been one of the most promising and exciting system process developments in the Milwaukee criminal justice system that I have ever experienced. Eleven months ago when we applied for Phase II, we expressed a deep commitment to working collaboratively to critically evaluate our existing processes, determine what needed to be adjusted and identify ways in which those processes could be changed to ensure they were consistent with not only with the current evidence, but in a way that could be tracked, evaluated and adjusted if necessary. Given the magnitude of this goal, and the tight timeline we were given to accomplish it, I would be less than honest if I did not reveal that I was concerned about our ability to complete this task as a criminal justice system collaborative. In fact, while there had been a number of mid-level individuals trying to implement several system-wide changes to the "system," especially concerning the use of risk and need information to make release, charging and sentencing decisions, the most significant challenge had been to get the decision-makers interested and committed to implement processes necessary to do this. EBDMI has provided us with the platform to accomplish this on an expedited basis.

Through the hard work, steadfast commitment to the EBDMI process (notwithstanding that this process took place during yet another historic Super Bowl Championship season for our beloved Green Bay Packers), the incredible assistance provided by Mimi Carter, and the deep commitment on the part of the Courts, the Public Defenders Office, the Department of Community Corrections, our local law enforcement partners, several key members of the community, and the District Attorney, John Chisholm, I can without reservation indicate that we are submitting a comprehensive and cohesive Application for Phase III of EBDMI that is not only "doable," but that the EBDMI partners are committed to implementing even in the unlikely event that we are not selected to move into Phase III.

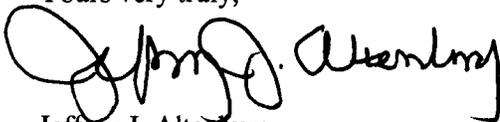

Significantly, our participation in EBDMI has led to two “system-wide” trainings at nearby Marquette Law School for prosecutors, judges, defense bar and local law enforcement on evidence based practices and risk tools, a major speech by District Attorney Chisholm concerning the need for the implementation of evidence based practices and justice reinvestment of the savings generated as a result of that implementation, and a panel discussion by the Chief Judge, Sheriff, and District Attorney before the business community sponsored by the Milwaukee Public Policy Forum. All of these events served to enhance public awareness of EBDMI but equally importantly, educate and obtain buy-in from the “front-line” individuals in the Milwaukee County Criminal Justice system about evidence based practices and the why and how they would be implemented in Milwaukee.

In my original letter in support of Milwaukee County’s participation, I referenced what I perceived to be the parallel’s between the EBDMI process, my personal goals of serving the community I help to represent in a fair, just and economical way, and District Attorney Chisholm’s goal of measuring and evaluating each and every harm and risk reduction strategies being implemented in Milwaukee County. I believe that has proven to be extremely true now that we have had the benefit of participating in this process. For this reason, I am personally committed to implementing the recommendations we have put forth related to CIT policing, strengthening the Diversion/Deferred Prosecution Agreement program, implementation of Universal Screening and dosage based sentencing, in addition to the related processes of implementing a book/bail/release system for the Milwaukee Police Department District Stations and the creation of a non-Court settlement conference regardless of whether Milwaukee County is selected to participate in EBDMI Phase III. Moreover, my certainty in making this pledge is supported by my knowledge that District Attorney Chisholm is equally committed to the implementation of these ideas and will ensure that I continue to play a significant part in this process.

While I believe our application candidly acknowledges those areas involving data collection and evaluation that pose significant challenges that we continue to struggle with, there is no doubt in my mind that the work that we have done over the last 11 months will allow us to continue to make substantial progress in addressing these gaps and moving toward implementing an infrastructure that will address these issues.

For these reasons, I urge your positive consideration of Milwaukee County’s application and provide us with the opportunity to ensure continued assistance with our EBDMI goals.

Yours very truly,

Jeffrey J. Altenburg
Deputy District Attorney
Milwaukee County

cc: District Attorney John T. Chisholm
The Honorable Jeffrey A. Kremers

Tom Barrett
Mayor, City of Milwaukee

June 28, 2011

Morris L. Thigpen, Director
National Institute of Corrections
320 First St. N.W.
Washington, D.C. 20543

Dear Mr. Thigpen:

I am pleased to support the application of the Milwaukee County Community Justice Council (CJC) to the National Institute of Corrections for Phase III of the Evidenced-Based Decision Making Initiative.

When Milwaukee's CJC first convened in 2006, there was an expectation that the collective leadership at the table could seize the opportunity to develop and implement real collaborative strategies "to advise and promote a more effective and efficient criminal justice system guided by the interests of the people that we serve" (CJC-County Board Resolution 2007). The Executive Committee identified relevant topics for discussion; created issue based sub-committees, and reported out to the community at large several times a year. Although we shared a vision for a safer and healthier community, there were a number of crime and violence reduction approaches taken by the variety of institutions and organizations represented; approaches that utilized intuitive responses to those that employed evidence. Furthermore, our distinct jurisdictional issues, including budgets, and other governing priorities challenged our planning process.

Nearly a year ago, I wrote to support our request to be selected for Phase II of the EBDM Initiative. In that letter, I wrote about my belief that meaningful reform and achievable strategies must be developed in collaboration with a variety of community partners. Collaboration meant different things to different people, however, and I worried that varying levels of commitment could present some difficulties in our efforts to proceed as a team. With excellent technical assistance and facilitation skills provided by Ms. Mimi Carter of the Center for Effective Public Policy, coupled with the benefit of long-term working relationships, the team worked to establish a fresh and more appropriate vision and mission for our project. During that process and many that followed, team members became more confident that individual ideas would be preserved; that suggestions might be combined and expanded upon that would help us reach our goals. That's a great start to achieve true collaboration. We have now benefitted from a rigorous review and planning process that truly enriched our relationships through shared planning and development activities, including system mapping, EBDM educational sessions, gap analysis, and priority setting. We've come a long way from 2006.

Morris L. Thigpen
June 29, 2011
Page 2

Despite our distinct government and community functions, some turf concerns, and even a couple of strained relationships, the team moved to a shared philosophy and vision for Milwaukee County which, along with significant discussion, debate, learning, and considerable deliberation, served to guide us in the development of our four harm reduction projects that are delineated in our proposal to the NIC.

It's been an arduous but fulfilling undertaking, to date. The commitment required to contribute as a true partner is significant. The time demands are as much of a challenge for my staff and for me as they are for all of the team members. I appreciate that the EBDM Initiative provides for a staff designee to speak on behalf of the Executives. I'm happy to say that the City has had consistent representation throughout Phase II, although my staff representative reports that some weeks she spends more time at the courthouse meeting on EBDM than she does at City Hall performing her many other duties. We view this as good teamwork and we will continue to add our influence, expertise, and staff assistance in order to further this process.

Milwaukee is poised at this time to roll-out a comprehensive and carefully developed, much vetted harm reduction work plan in great part because of the leadership of Judge Kremers, the project coordinators and because of the coaching afforded our team throughout Phase II of the EBDM initiative. Although the City will move forward with our partners to apply these strategies even if we are not selected in the next round, we believe that we have the right framework, structures and collaborative commitment to successfully pilot Phase III.

I hope that the NIC will agree and will favorably consider the Milwaukee application. Thank you for your attention to this matter.

Sincerely,

A handwritten signature in black ink, appearing to read "Tom Barrett". The signature is fluid and cursive, with a large initial "T" and a long, sweeping underline.

Tom Barrett
Mayor

U.S. Department of Justice

United States Marshals Service

Eastern District of Wisconsin

Milwaukee, WI 53202

June 20, 2011

Morris Thigpen
Director, National Institute of Corrections

Dear Mr. Thigpen:

I am currently the United States Marshal for the Eastern District of Wisconsin. Previously, as the second in command of the Milwaukee County Sheriff's Office, I was originally involved in the creation of the Milwaukee County Community Justice Council (MCCJC). Our council was established to coordinate services and to allocate financial resources to ensure crime reduction, victim support, offender accountability, and restorative community-based programs. Through strategic planning and research, the MCCJC identified, evaluates and develops strategies to both improve the justice system, enhance public safety, and the quality of life in Milwaukee County. Inherent in this philosophy is the goal of establishing a collaborative process between the major political leaders in Milwaukee and to find ways to reduce violence in our community.

I am writing to you in my capacity as an ex-officio member of the MCCJC Executive Council and in support of our application for Phase III of the Evidence-Based Decision Making Initiative. Eleven months ago, when we applied for Phase II, we believed that we needed to show our community stakeholders, whether they were our partners on the Council, our governmental funders, or the public that our decisions were public safety oriented, data driven and fiscally responsible. It was thought that too many decisions were driven by what someone intuitively felt was correct without anchoring it to any needs and risk based analysis.

Your agency rewarded us with the opportunity to do just that. First we needed to establish that we had the time, talent and energy to undertake a self analysis of our criminal justice system, and cast it in the terminology of the framework of the initiative. One of the significant challenges was to develop working relationships with each other that were not ego or turf driven, but rather from "what is best for the community as a whole" perspective. This meant developing a willingness to explain our respective views on each other's roles without rancor and to listen without defensiveness.

We certainly learned that we didn't know what we thought we did about why we have always done some of the things we do.

In addition each partner had to make an unprecedented time commitment to the process. So in addition to our "day jobs" of running the system, we have spent countless hours together to develop a level of collaboration that for the most part will serve us well into the future. We certainly learned I think that our previous level of collaboration was more theoretical than actual. We met, we talked and we planned; but were still only in the early stages of "doing" when we embarked on this grant.

Another significant challenge is designing a process for measuring where we are so as to be able to accurately assess the success, or failure, of any changes. Inherent in this challenge is the notion that we must develop a strategy for educating the public that we are first committed to public safety while holding offenders accountable all while using public dollars wisely. Decisions based on individual cases may make for good "sound bites" but decisions based on data driven analysis make for good policy and ultimately a higher degree of safety at a lower cost must be our shared mantra.

Through this process and the strong assistance provided by Ms. Carter, we have realized a much greater level of cohesion and a concomitant ability to, again for the most part, put aside ego and turf issues to better assess the strengths and weaknesses in our criminal justice system, and where we need to focus our efforts to improve. The framework inherent in the initiative has helped us better identify those critical decision points we need to change to make our system more responsive and evidence based. We have been able to take the first critical steps to plan for the implementation of real change in how we deliver on our commitment to our community to improve our performance according to evidence-based decision making principles so as to make smarter use of limited resources for protecting the community and punishing offenders.

As the U.S. Marshal and a law enforcement professional with 35 years in public service I am committed to nothing less. As one of the principal founding members of the MCCJC, I strongly believe that collaboratively we have to further this process, whether or not we are selected for Phase III. We have already started on one of our initiatives, bringing Judges, Commissioners, District Attorneys, Public Defenders, Probation Officers, Pre-trial monitors, and law enforcement for two days of discussion and learning about evidence based decision making related to bail and pre-trial monitoring. I believe that with the assistance of the NIC we can administer justice in a more intelligent deliberative fashion that will benefit all stakeholders in the Milwaukee county criminal justice system.

I hope you will consider our application favorably.

Thank you,

Kevin A. Carr
U.S. Marshal

OFFICE OF THE DISTRICT ATTORNEY
Milwaukee County

JOHN T. CHISHOLM • District Attorney

Chief Deputy Kent L. Lovern, Deputies James J. Martin, Patrick J. Kenney, Lovell Johnson, Jr., Jeffrey J. Altenburg

June 20, 2011

Morris Thigpen
 Director, National Institute of Corrections
 National Institute of Corrections
 320 First Street, NW
 Washington DC 20534

Dear Mr. Thigpen:

I write to support the application for Phase III of the National Institute of Correction's Evidence Based Decision Making Initiative ("EBDMI") grant and to reflect on the narrative of progress that has transpired since my first letter of support in July of 2010.

As I indicated in our original application, I believe that Milwaukee County's public safety leaders are committed to change and willing to do the hard work that is required to evolve a system that operates on many deeply engrained and longstanding practices that have not always benefitted from rigorous self examination and informed discussion about what truly works to keep the community safe while reducing the unintended harm of generalized over-reliance on criminal justice structures to deal with societal ills.

The single greatest obstacle to substantive reform, in my view, is that the language of public engagement on crime has too often been confined to easy descriptions of how we escalate punishment in relation to public perceptions of crime. Each of the key stakeholders is a public official either directly or indirectly accountable to the public. The primary means of communication with the public is through the media and evidence based system reform is not a topic that lends itself to facile sound bites when the media tends to focus on the extreme cases of unlawful behavior. The countervailing dynamic at play, and the real opportunity for informed progress, is the dawning realization with the public that public safety is an expensive endeavor, and they should expect a reasoned use of scarce tax dollars to the greatest effect.

The greatest benefit of this process has therefore been the creation of a common message and framework of discussion that acknowledges our responsibility to legitimate public safety concerns by focusing on the reduction of the number of victims while engaging in rational and meaningful discussion of what really works to reduce recidivism. The hard work of mapping our system, developing logic models and narrowing our focus to accomplish real but significant change is just the process of forcing us to talk to one another on a daily basis and in rational terms. It does not mean that everyone in our system agrees with every decision, but it does mean that we strive for consensus and move forward in substantive ways.

For example, in the last six months we have worked to examine our system closely, selected key decision points to concentrate reform efforts and publicly engaged in the difficult discussions of how we collaborate. Through the leadership of the Chief Judge and the other members of the Policy Team, we have convened two general education seminars attended by defense attorneys, prosecutors, law enforcement and judges to inform them on issues related to bail reform and evidence based decision making. The guidance provided by Mimi Carter has been invaluable, and I think we have moved to a point that we will continue the progress regardless of the final

decision on the Phase III application. In addition, I would note that this has been a time of significant discussion at the state level related to spending priorities and we have made a strong effort to gain wider acceptance of this framework beyond Milwaukee County.

One of the unique aspects of the approach that we have taken with respect to the process has been the close collaboration between senior members of the State Public Defender and my office. I remain committed to ensuring that this close working relationship will continue with not only the Public Defender's Office, but the other key stakeholders who I know are strongly committed to this initiative. This continued collaboration is the only way we will be able to ensure that the changes we propose are accomplished.

Although we have significant challenges ahead, our involvement in the EBDMI process has provided Milwaukee County with the means to move forward in an accountable and effective direction.

Sincerely yours,

A handwritten signature in black ink, appearing to read "John Chisholm", with a long horizontal flourish extending to the right.

John Chisholm
Milwaukee County District Attorney

County of Milwaukee
Office of the Sheriff

June 29, 2011

David A. Clarke Jr.
Sheriff

To: The Honorable Jeffrey A. Kremers, Chief Judge, First Judicial District
Chairman, Milwaukee County Community Justice Council Executive Committee

Mr. Morris Thigpen
Director, National Institute of Corrections

Dear Judge Kremers and Mr. Thigpen:

I wish to express my continued support, both personally and as the leader of my public service agency, for Milwaukee County's inclusion in Phase III of the Evidence-Based Decision Making Initiative. The initiative's goal, to work cooperatively with systems of government that are "...vision-driven, effective and efficient," will continue to find a willing partner here in the Milwaukee County Sheriff's Office. In my first letter of support last year for Milwaukee's application for the EBDM initiative, I noted my belief in, "...the concept of decision-making that uses empirical data that is specific, targeted, and comprehensive in both planning and scope of execution; and is highly fluid to adjust to changing trends." Upon reflection of where we have come with this project since that time, I have personally seen that the NIC's desire to see comprehensive solutions that establish processes for decision making that can be applied to whole systems, falls directly in line with this core belief of our agency: That improved quality of life of our citizenry will be achieved through a service-based justice approach that reduces risk and harm without sacrificing accountability or victim's rights, using real-time data to benchmark our effectiveness.

We now look forward to implementing the full framework in Phase III, as the potential impact promises a reduction in community harm here in Milwaukee County. The potential for the EBDM Framework has been clear from the onset: "...true system change requires leadership from key policymakers; commitment throughout all levels of justice system organizations, and policy and practice alignment." I couldn't agree more. Again, in my earlier letter of support for the EBDM application I offered that, "By increasing diverse partnerships with our fellow professionals in the courts, district attorney's office, public defenders office, juvenile justice system, and community-based advocacy groups; increasing our footprint in forward-looking technologies; and aggressively identifying best-practices in all justice functions, the Milwaukee County Sheriff's Office will speed productivity and ease the flow of information resulting in meaningful savings through both efficiencies and effectiveness." This true sharing, of not just data and analysis but of actual decision-making input, has already been enhanced (on the ground in real time) by Milwaukee's involvement with establishing the Framework. It has, already, shown its potential to be a game-changer.

I want to thank the NIC for its continued support of my office, and I welcome you to contact me if I can provide any further support for this initiative.

Sincerely,

David A. Clarke Jr., Sheriff
Milwaukee County

Service to the Community Since 1835

Police Department

Edward A. Flynn
Chief of Police

June 30, 2011

Mr. Morris Thigpen, Director
National Institute of Corrections
320 First Street N.W.
Washington, D.C. 20543

Dear Mr. Thigpen:

I am writing in support of the Milwaukee County Community Justice Council's application for phase III of the Evidence-Based Decision Making Initiative. Since applying for phase II, we have attempted to demonstrate to community stakeholders, funding sponsors and the public that the decisions made by the Community Justice Council are public safety oriented, data driven and fiscally responsible. Our discussions and decisions are guided by thorough analysis.

For the first time, I believe we have undertaken a serious self-analysis of the criminal justice system in Milwaukee County. One of our significant challenges was to develop honest relationships that prove beneficial to the community. We soon realized there was much to learn about the actual roles and responsibilities of the various entities.

Each partner had to make a significant time commitment to the process. So, in addition to our daily responsibilities, we have invested numerous hours together to develop a level of collaboration that will serve us well in the future. We found our previous level of collaboration was more imagined than real. The time demands are as much of a challenge for my staff and for me as they are for all of the team members.

Another significant challenge we face is designing a process for evaluating and assessing our success or failure, using measurable outcomes. We must develop a strategy for educating the public regarding our commitment to public safety while still holding offenders accountable. With our decisions based on data driven analysis, we can make strong policy statements to enhance public safety while being fiscally responsible.

As mentioned previously, our increased cohesiveness allows us to honestly assess the strengths and weaknesses of our criminal justice system and help us focus on areas in need of improvement. The framework of this initiative has aided in identifying critical areas in need of change. Change will make our criminal justice system more responsive and efficient. We have begun the initial steps critical to implement real change and enhance the delivery of our services. We have strengthened our commitment to the community to improve our performance based on evidence-based decisions and more efficient use of resources to protect the community and punish offenders. We view this as good teamwork and we will continue to add our influence, expertise, and staff assistance in order to further this process.

Page 2
CJC Support Letter
June 30, 2011

The Milwaukee Police Department's mission is to reduce crime, fear, and disorder. I am supportive of the Milwaukee County Community Justice Council's efforts. With funding to implement phase III, we can continue our objective to bring all the components of the criminal justice system together to improve our bail and pre-trial monitoring guidelines. I appreciate your consideration of our application and hope for a favorable reply.

Sincerely,

A handwritten signature in black ink, reading "Edward A. Flynn". The signature is written in a cursive style with a long, sweeping underline.

State of Wisconsin Department of Corrections

June 23, 2011

Mr. Morris Thigpen
Director, National Institute of Corrections

Dear Mr. Thigpen:

I am writing to support the Milwaukee County Community Justice Council's application for phase III of the Evidence-Based Decision Making Initiative. Several months ago, when we applied for phase II, I wrote that as the Regional Chief of Milwaukee County, Wisconsin Department of Corrections, Division of Community Corrections, I was pleased to express my support for the "*Evidence Based Decision Making in Local Criminal Justice Systems Initiative*" grant application to the National Institute of Justice. The Wisconsin Department of Corrections, especially the Division of Community Corrections, remains an active participant in the Milwaukee County Criminal Justice Council. It is critical that the council's initiatives undergo a rigorous and objective evaluation in order to measure the impact and effectiveness, but also to provide useful information for criminal justice practitioners and policy. As the chief corrections administrator in the Milwaukee community, I am committed to strategically deploying resources to assure effective management of both personnel and budget. We, the staff of the Department of Corrections, intend to build on a foundation of research and best practices to assure risk/harm reduction, the lowering of recidivism rates and better outcomes for our community. Our shared goal of harm reduction envisions a stronger and more vibrant community with less crime, fewer victims. Further, we are committed to building strong families, and offenders engaged in productive, healthy lifestyles.

Your agency rewarded us with the opportunity to do just that. First, we needed to establish that we had the time, talent and energy to undertake a self analysis of our criminal justice system and cast it in the terminology of the framework of the initiative. One of the significant challenges was to develop working relationships with each other that were not ego or silo driven, but rather from a "what is best for the community as a whole" perspective. This meant developing a willingness to explain our respective views on each others roles without rancor and to listen without defensiveness.

Further, this has been a paradigm shift for probation agents, to work collaboratively with our community justice stakeholders, by not only sharing information, but resources also. Presently, the Department of Correction is in the process of implementing a new system-wide risk/need assessment tool that is empirically based, North Pointe COMPAS. Use of a risk assessment tool will encourage staff to adopt a practice of relying on evidence to inform decision making—rather than relying upon past practices. Additionally, Community Corrections is committed to "re-

tooling” our organizational culture to align with a new vision, focused on making “what works’, work. We intend to accomplish this by staff training, with a focus on motivational interviewing, effective use of the “carrot” rather than the “stick” and a continual commitment to encouragement of community partnerships.

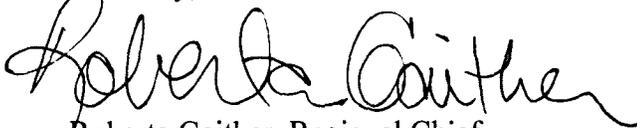

This is the first time in recent history that collectively we have regularly come together to assess opportunities for information sharing and collaboration via a discussion of our individual agencies offender reentry plans. To identify pressure points within the entire systems that could potentially buckle with added pressure, and ensure the best use of limited resources by reducing duplicate or conflicting policing and supervision strategies. It has required an unprecedented time commitment to the process. This is in addition to my duties as the Regional Chief of Community Corrections in Milwaukee, WI, with supervision and management of an organization employing more than 400 professional staff, with oversight responsibility for over 14,000 offenders on some form of community supervision. I admit that at times, it has been an overwhelming, daunting task, but one that I assume willingly, as the success of this endeavor remains imperative to not only the mission of the Community Justice Council, but to increasing public safety in Milwaukee County. We are still in the early stages of “doing” what we embarked on during this grant application, however the unanimous commitment by all participating agencies is evidenced by the commitment of interested stakeholders to participate in this process.

Through this process and the strong assistance and guidance provided by Ms. Carter, we have realized a much greater level of cohesion and a concomitant ability to better assess the strengths and weaknesses in our criminal justice system. We are focused on where we need to make more effort to improve. The framework that is inherent in the initiative has helped us better identify those critical decision points we need to change to make our system more responsive and evidence based. We have been able to take the first critical steps to plan for the implementation of real change in how we deliver on our commitment to our community to improve our performance according to evidence-based decision making principles so as to make smarter use of limited resources for protecting the community and punishing offenders.

I along with my colleagues, are committed to nothing less. I will use my position as Milwaukee County Regional Chief to further this process, whether or not we are selected for phase III. Further, as the Department of Corrections is committed to using evidence based research and best practices in obtaining risk/harm reduction and lowering recidivism rates, we remain committed and have a crucial role to play, both within the system and to the public, and I intend to meet that obligation.

I look forward to participating in phase three of this initiative.

Sincerely,

Washington, D.C. 20543

Dear Mr. Thigpen:

I am writing in support of the Milwaukee County Community Justice Council's application for Phase III of the Evidence-Based Decision Making Initiative as the chair of the Milwaukee County Board of Supervisors' Judiciary, Safety and General Services Committee.

I have been encouraged by the criminal justice community's efforts to leave turf and personal agendas at the door to collaborate and coordinate disparate funding efforts and share responsibilities so that efforts to use an idea such as "universal screening" may be implemented to create a bail matrix to set bail on risk scores and develop tools for bail setting.

During the past three years, the County Board's Finance and Audit Committee heard testimony from the community justice council representatives and advocates to fund a universal screening pilot project; this past fall the county board approved funding \$250,000 to determine the risk and needs level for individuals before a person's first court hearing.

The collaborative efforts of the local Evidence-Based Decision Making initiative teams have led to a prioritizing to strengthen Crisis Intervention Teams, employ Dosage-Based Sentencing, encourage the use of Deferred Prosecution Agreements and Diversions besides implementing the universal screening pilot.

It is my hope that the Milwaukee County Community Justice Council and its supporters have earned a successful outcome after submittal of the Phase III application.

Sincerely,

Willie Johnson, Jr.

June 20, 2011

Morris Thigpen
Director, National Institute of Corrections

Dear Mr. Thigpen:

I am writing to support the Milwaukee County Community Justice Council's application for phase III of the Evidence-Based Decision Making Initiative. Eleven months ago when we applied for phase II, I wrote that we needed to show our community stakeholders, whether they were our partners on the Council, our governmental funders or the public that our decisions were public safety oriented, data driven and fiscally responsible. I felt that too many decisions were driven by what someone intuitively felt was correct without anchoring it to any needs and risk based analysis.

Your agency rewarded us with the opportunity to do just that. First we needed to establish that we had the time, talent and energy to undertake a self analysis of our criminal justice system and cast it in the terminology of the framework of the initiative. One of the significant challenges was to develop working relationships with each other that were not ego or turf driven but rather from a "what is best for the community as a whole" perspective. This meant developing a willingness to explain our respective views on each others roles without rancor and to listen without defensiveness.

We certainly learned that we didn't know what we thought we did about why we have always done some of the things we do.

In addition each partner had to make an unprecedented time commitment to the process. So in addition to our "day jobs" of running the system, we have spent countless hours together to develop a level of collaboration that for the most part will serve us well into the future. We certainly learned I think that our previous level of collaboration was more theoretical than actual. We met, we talked and we planned but were still only in the early stages of "doing" when we embarked on this grant.

Another significant challenge is designing a process for measuring where we are so as to be able to accurately assess the success, or failure, of any changes. Inherent in this challenge is the notion that we must develop a strategy for educating the public that we are first committed to public safety while holding offenders accountable all while using public dollars wisely. Decisions based on individual cases may make for good "sound bites" but decisions based on data driven analysis make for good policy and ultimately a higher degree of safety at a lower cost must be our shared mantra.

Through this process and the strong assistance provided by Ms. Carter we have realized a much greater level of cohesion and a concomitant ability to, again for the most part, put aside ego and turf issues to better assess the strengths and weaknesses in our criminal justice system and where we need to focus our efforts to improve. The framework inherent in the initiative has helped us better identify those critical decision points we need to change to make our system more responsive and evidence based. We have been able to take the first critical steps to plan for the implementation of real change in how we deliver on our commitment to our community to improve our performance according to evidence-based decision making principles so as to make smarter use of limited resources for protecting the community and punishing offenders.

I am committed to nothing less. I will use all my powers as chief judge to further this process, whether or not we are selected for phase III. We have already started on one of our initiatives, bringing Judges, Commissioners, District Attorneys, Public Defenders, Probation Officers, Pre-trial monitors, and law enforcement for two days of discussion and learning about evidence based decision making related to bail and pre-trial monitoring. I believe that the Judiciary has a strong role to play, both within the system and to the public, and I intend to meet that obligation.

I hope you will consider our application favorably.

Thank you,

Jeffrey A. Kremers

June 29, 2011

Morris Thigpen
Director, National Institute of Corrections

Dear Mr. Thigpen:

I am writing to support the Milwaukee County Community Justice Council's application for phase III of the Evidence-Based Decision Making Initiative. I have been a part of this group for only a few months. I stepped in to represent the Wisconsin Office of Justice Assistance, after my supervisor, the Justice Programs Director left the employment of OJA for another opportunity.

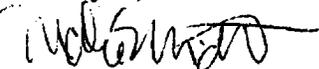

As a representative of a state agency, I am not directly involved with the work of the local group. This has been the most challenging part of this initiative personally, as OJA is the state administering agency for federal funds, and does not direct local planning efforts. However, in the short time that I have been attending the Milwaukee County Community Justice Council meetings, what has impressed me the most is the commitment of the members. Meetings are well attended and all parties are engaged in the process. This group has been doing challenging and difficult work and the members bring enthusiasm and determination with them every time.

I was not involved with the initiative during the phase II application process, so I did not submit a letter of support at that time. As such, I can not speak to the ways in which my views have changed or been reinforced since that time.

Personally, I commit to being the representative from OJA on the Milwaukee County Community Justice Council until a new Justice Programs Director is hired at OJA. I will volunteer any technical support or resources as appropriate from OJA to assist in Milwaukee's initiative. I will also use the experience I gain from this group to assist other counties planning and Criminal Justice Coordinating Councils to implement evidence-based practices across the state.

I hope that Milwaukee's application is strongly considered as the work that is being done not only benefits the criminal justice system in Milwaukee, but other counties in the state as well.

Thank you,

Niki Leicht
Criminal Justice Policy Analyst
Wisconsin Office of Justice Assistance

Benedict Center

Compassion • Justice • Action • Transformation

May 27, 2011

Morris Thigpen, Director
National Institute of Corrections

Dear Director Thigpen:

Time and well-informed representation of diverse community justice concerns has been the greatest challenge for my agency, and for myself as the representative of a community based criminal justice agency on the Community Justice Council Executive Committee and the Evidence Based Decision Making Initiative Policy Team.

As an individual trained in criminology, executive director of a 37 year old activist criminal justice agency, and a former Board Member of the International Community Corrections Association, I have had the opportunity to immerse myself and my agency in best practices and leading research in what works in community justice for 23 years. It is an outside the system perspective that can be at odds with leadership highly skilled in the professions they command. It is also a perspective often out of the realm of easy consideration for our highly segregated community.

The challenge in the course of the Phase II EBDM initiative has been to ensure strong, diverse contributions from an informed community perspective in the midst of incredibly intricate, time-consuming research, deliberation and consideration by partners from all parts of the system. In other words, maintaining a vital voice in the midst of the most far-reaching, open and exhilarating discussion about serious change in the criminal justice system that has occurred in the two decades I've been directly involved.

In my original letter of support for this project, I wrote: I believe deeply in a model of community justice and believe the route to achieving that model is a coordinated, collaborative system of evidence based practices within the system and within community-based programs and nonprofits.

I am truly in awe of the coordination and collaboration the Phase II initiative has drawn from all parts of our system, and increasingly the community. The sheer volume of knowledgeable professionals from every part of the system who have been engaged from work groups up to policy team meetings is constantly reaffirming the value of this massive endeavor.

As deeply as I supported our system undertaking the EBDM challenge for Phase II, I never envisioned the depth of commitment and outcomes that undertaking would produce. The impact of such strong collaboration alone is propelling our system into a model for rational change that would benefit every justice system in this nation.

The Benedict Center and I are committed to working within our nonprofit and faith-based communities to enlighten and build support and understanding of the intrinsic value of the changes coming. These communities, in turn, will reach out to their own constituents, who may be more wary of community justice solutions.

Community acceptance will be key to the success of new initiatives, especially when highly charged talk radio and TV news seek out that first explosive situation, using it to disprove the whole. Widespread public understanding can instead defuse random attacks on substance and reason. Public outreach and education is now critical. The Benedict Center will be there with or without the highly sought after Phase III support.

Sincerely,

Kit Murphy McNally
Executive Director

1000 West 11th Street, Suite 200 • Portland, OR 97203

June 20, 2011

Morris Thigpen
Director, National Institute of Corrections

Dear Mr. Thigpen:

I am writing to support the Milwaukee County Community Justice Council's application for phase III of the Evidence-Based Decision Making Initiative. Milwaukee has made tremendous strides through the generous support from your agency in funding phase II.

Through the committed efforts of the leadership in criminal justice in Milwaukee, a true collaborative approach is underway to take the first critical steps to plan for the implementation of real change in how we deliver on our commitment to our community to improve our performance according to evidence-based decision making principles so as to make smarter use of limited resources for protecting the community and punishing offenders.

As the Director of the Milwaukee Homicide Review Commission, where we take an epidemiologic perspective on violence, are committed to assisting in designing a process for measuring where we are so as to be able to accurately assess the success, or failure, of any changes. Inherent in this challenge is the notion that we must develop a strategy for educating the public that we are first committed to public safety while holding offenders accountable all while using public dollars wisely. Decisions based on individual cases may make for good "sound bites" but decisions based on data driven analysis make for good policy and ultimately a higher degree of safety at a lower cost must be our shared mantra.

I hope you will consider our application favorably.

Thank you,

Re: EBDM Grant-Phase III Application

Dear Mr. Thigpen:

I write in support of Milwaukee's application to be a Phase III Implementation Site. Two years ago our District Attorney, John Chisholm, and I were invited to Baltimore to meet with other criminal justice professionals to discuss the Framework which was then in the Phase I process. I was immediately impressed by the ambitious and sophisticated approach that was being designed. I recall reporting to many people in our criminal justice system that this project had a high potential to re-frame how we thought about and conducted our work. I had reservations, however, based on the challenges I saw to its implementation in a large urban court system. I strongly supported the decision of our Community Justice Council to apply as a seed site despite these potential difficulties.

In my letter in support of our application, I expressed optimism that the grant would help us make real change. What I have seen in Milwaukee has greatly exceeded my expectations. A great deal of our progress would not have been possible without the superb guidance and mentoring provided by Mimi Carter. But it is also clear that all the participants in our criminal justice system recognized the need for change. Historically our reform efforts were focused on one part of our system at a time, one type of case or offender, or were led by a subgroup within our system. Never before have we examined our system root and branch. Nor have we had a methodology which encouraged and structured a system wide re-thinking. The EBDMI project also attracted the participation of many with a strong interest in the outcomes of our criminal justice system who were not regular participants in our policy making. Voices from the mental health advocacy community, inputs from public health professionals, social science professors and local psychiatrists guided our decisions about priorities for change.

While it is now clear that our earlier work forming the Community Justice Council had laid an important foundation for the EBDMI grant, those efforts alone would never have led to the coherent and system wide re-framing to be found in our EBDM Phase III Application. The role of this grant and the technical assistance we have received was essential to addressing needed changes.

As a large urban community, Milwaukee has assets which it can draw upon as it works to implement the changes that have been diligently mapped out in our logic model, work plans and narratives. We believe that the size of our community will make it a useful laboratory for testing the Framework.

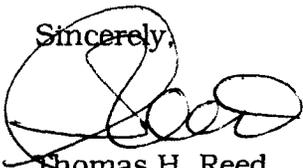

I can assure you that our agency, which provides representation to all indigent criminal defendants through staff and private bar attorneys, will provide unqualified support

to the implementation work. We stand in an important place in the process as we work directly with criminal defendants, their families and the communities in which they live. We are up to the task of helping this most vulnerable group to understand how the new expectations of an evidence based system better serve their interests as well as that of the society at large. We also play an important role in shaping judicial decisions by the quality and consistency of our arguments to judicial officers. EBDMI changes the way cases are handled and presented and privileges new information that is seen as persuasive. Defense attorneys need to strengthen their advocacy to reflect these changes. Finally, we are in a position to train the lawyers on staff and in the Milwaukee legal community about the grant and changes in our system. We will continue to be active in each of these roles.

It has been my honor to serve on the Executive Committee of the Community Justice Council since its inception. I can clearly see the commitment of the agency leadership in each organization to working on Phase III initiatives regardless of whether we are selected. I have no illusions, however, that we would not benefit in a myriad of ways from the assistance provided to the grant recipients. While we don't always agree about public policy or politics, our criminal justice leaders work very hard to work collaboratively and respect the differences that are inevitable. Evidence to the contrary is the rare exception. People in this group are united by their belief that this community is at a turning point and sound criminal justice policy is important for public safety and for the economic viability of the region. They also share a deep tradition of focusing on what works regardless of its ideological appeal. I am convinced that one of the strengths of the Framework is that it places an emphasis on evidence based practices supported by reliable data. There is unqualified support for this approach among all of our leadership.

Thank you for the opportunity to participate in this very important project. It has already had a large impact on our community.

Sincerely,

A handwritten signature in black ink, appearing to read 'Thomas H. Reed', written over a horizontal line.

Re: EBDMI Application of Milwaukee County

Dear Mr. Thigpen:

Learning and applying the EBDM discipline has been challenging, intriguing and rewarding, and particularly so for a judge.

In our everyday work deciding cases judges are called by two competing duties, our duty to treat each person individually and our duty to enforce rules that apply generally to all.

In the criminal field, and particularly when it comes to discretionary decisions like setting bail and imposing sentences, that duty to treat each person individually has fostered an unfortunate reliance on intuition and a mild disregard for truths that apply generally, especially those that are supported by statistical and actuarial evidence. This is true even though years of experience have shown the flaws in judges relying only on intuition to dispense justice and protect the community.

EBDM challenges us as judges to weigh what we know about the person standing before us with what we know about large groups of people in similar situations, and it challenges us to find out more about those other people. EBDM gives us a store of confidence that we can make the right call for the individual – the right amount of bail, the right amount of jail, the right amount of probation – because we have come to know what works for many others in similar circumstances.

MILWAUKEE COUNTY CIRCUIT COURT
BRANCH 29

Mr. Morris Thigpen
June 30, 2011
Page Two

I was not a member of the policy team when Milwaukee applied for a shot at Phase III. I joined the team when we traveled to Bethesda for the EBDM boot camp. I am quite happy that Judge Kremers asked me to be there. Since returning to Milwaukee, I have had repeated opportunities, in my post as presiding judge of the felony division and supervising two dozen branches of the court, to question why we do the things we do and whether there is any data to show that we are doing it the best we can. EBDM has already served us well in Milwaukee.

Milwaukee would be a perfect place for NIC to showcase EBDM principles. You can tell from our work in Phase II that we are hard-working, open minded, highly collaborative, sophisticated and relatively well-positioned to get to work immediately. I join the others in pledging my full commitment to making a success out of the innovative projects that we are proposing for Phase III.

Sincerely,

Richard J. Sankovitz
Circuit Court Judge

JUSTICE 2000

A Division of Community Advocates, Inc.

Advocating for Alternatives

Prisons to Health and Safety

June 20, 2011

Morris Thigpen
Director, National Institute of Corrections

Dear Mr. Thigpen:

Justice 2000's mission is to promote and expand opportunities for the safe release and community reintegration of criminal defendants and offenders. Our belief is that social services and treatment interventions, when combined with community case management and supervision, can be a useful, effective alternative to incarceration while still maintaining for public safety concerns.

I am writing in support of the Milwaukee County Community Justice Council's application for phase III of the Evidence Based Decision Making Initiative. About a year ago I was asked if Milwaukee County was ready to take on the task of Phase II of the Evidence Based Decision Making Initiative and frankly I was supportive but skeptical. As I wrote in my previous letter of support for Phase II, too long have we the criminal justice stakeholders made decisions based on political maneuvering or straight intuition; however my perspective has dramatically changed, largely because of NIC award of technical assistance and the true commitment of all system actors to do what is in the best interest of the community at large.

In Phase II my agency and I have been challenged to examine our practices and hold them to a higher standard than previously asked. While this at times has been difficult to do because the process has been critical of some of our long standing procedures and policies, we remain committed to following what the evidence says produces the best results for our community. With the goal of making our criminal justice system more effective, we eagerly look forward to continuing this educational and transformative process in Phase III and beyond.

Sincerely,

A handwritten signature in black ink, appearing to read "Nick Sayner". The signature is fluid and cursive.

Re: EBDMI Grant phase III application

Dear Mr. Thigpen,

I am pleased to write to you about my experience with the Evidence-Based Decision-Making Initiative (EDBMI) Grant that was awarded to Milwaukee County approximately 11 months ago. For me, the greatest challenge has been to truly understand what evidence-based decision making is all about and to understand all the steps that must take place in order for evidence to guide our decisions. The system-map was fascinating and came easily, but the work that followed, such as workplans, logic models and scorecards, was not intuitive and forced me to look at our system in a completely different way. Struggling with these concepts, however, forced me to really study and ask questions. This process has given me a greater appreciation and understanding of how to make changes that are not only evidence-based, but can be modified when necessary by collecting data and realigning programs as the data suggests.

For the staff of the Public Defenders Office, the EDBMI was predominately greeted with an open mind. As we moved through Phase II, system-wide training occurred on the issues of bail and pretrial risk and needs assessments (universal screening), where our staff certainly challenged many of the concepts that the experts brought to the training, but left the training with a greater understanding of risk assessment instruments and how these evidence-based tools can guide the recommendations they make in court. Another significant benefit to the system-wide training was that never in the eighteen years that I have been a public defender have the judges, district attorneys, court professionals, department of correction and defense bar sat in the same room and heard the same information. While I suspect we all took away slightly different information based upon our roles in the criminal justice system, the collaborative approach to training had a significant impact on how we all viewed each other and the responsibilities we have and where within our ethical boundaries we can agree on common evidence-based research to supports our recommendations and decisions.

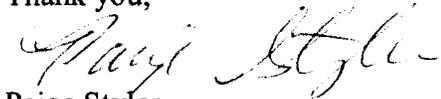

When I wrote you in July of 2010, I emphasized the need to have a systematic approach to making long-lasting evidence-based decisions and programming. While we, as a criminal justice system, were collaborating on specific programs, there was not a broad overall collaborative approach on system-wide issues. I think that this is the area we improved upon the most over the last 11 months. Today, all stakeholders communicate differently and with a different level of respect for each other and to try and find common ground for collaboration. It is not to say that there have not been bumps in the road, but

there is no doubt we are far more collaborative with all the stakeholders and are committed as a group to evidence-based decision making.

My agency, through our State Public Defender, Kelli Thompson and First Assistant of the Milwaukee Trial Division, Tom Reed, remain completely committed to participate in phase III of the EDBMI process. My agency has continued to allow me to serve as one of the three coordinators of this grant and to participate in all EDBMI activities to help in any way to make long-lasting systematic changes in our criminal justice system. In addition, my office will continue to train both staff public defenders and the defense bar on this grant and the changes in the system. Most importantly, my office truly believes in the evidence-based decision making process that this grant has so graciously afforded us. We will do everything in our power to continue to work with all stakeholders and others in the community to explain the benefits that this work brings to our criminal justice system. And while, I really hope that Milwaukee is awarded with Phase III of the EDBMI initiative, we as an agency will continue to work on the programs outlined in each of our workplans as well as other initiatives that were discovered as part of this grant. This work will result in collaborative, evidence-based systemic change in our criminal justice system.

Last, but certainly not least, I would be remiss if I did not mention the invaluable help that our technical assistant Mimi Carter brought to the EDBMI process for Milwaukee. Her depth of knowledge, her unbelievable work ethic and her amazing communication skills have created an atmosphere of collaboration and respect that will have a long-lasting effect in the Milwaukee criminal justice system.

Thank you,

Paige Styler

Attorney at Law

Assistant State Public Defender

Milwaukee County

Holly Szablewski • Criminal Court Coordinator

June 27, 2011

Mr. Morris Thigpen
Director, National Institute of Corrections

Dear Mr. Thigpen:

I am writing to express my support for the Milwaukee County Community Justice Council's application for Phase III of the Evidence-Based Decision Making Initiative (EBDMI). Less than one year ago, Milwaukee County made the decision to pursue participation in this initiative. It was not a decision made lightly as there was some skepticism among our team as to whether Milwaukee was fully prepared to commit to the rigors of this initiative and come together in the collaborative manner prescribed by the EBDMI Framework.

I have been privileged to serve as a member of our EBDMI Policy Team. In my original statement of interest to serve on the team, I indicated a desire to insure that bail decisions as well as our pretrial service programs are rooted in legal and evidence-based practices. Participation in the initiative to date has strongly reinforced those desires as well as my commitment to insure completion of the work necessary to align practices with this vision. Having seen the system-wide effects of the loss of universal jail screening here in 2000, it became clear to me that the EBDMI would provide the impetus and support necessary for a much needed re-design of front-end decision making in Milwaukee.

One of the most significant challenges to date has been the extraordinary time commitment required of every team member to accomplish the work of the initiative. Ironically, the time demand placed on our policy team and work group members has actually ended up serving as a vehicle that has caused us to work together more closely, effectively and efficiently.

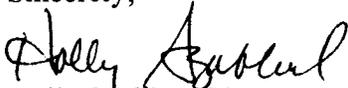

Another significant challenge we have encountered that we will need to continue addressing as we advance our four initiatives, is the difficulty in pulling together baseline performance and outcome data from the multitude of information systems so that we can accurately assess the impact of our work going forward. We learned in Phase II that our stakeholder agencies internally collect, analyze and utilize a tremendous amount of data, but not in a manner that consistently allows system leaders to make long-range, system-wide data driven decisions.

Participation in the EBDMI has changed my perspective. Having worked in our system for almost 24 years, I was beginning to resign myself to the fact that we were hopelessly stuck in the very frustrating “this is the way we’ve always done this” and “that won’t work in Milwaukee” way of thinking. As the work of our Policy Team and work groups began to evolve, it became apparent that our usual way of doing business with each other was truly changing. Old “turf wars” and self-interests have been set aside and real discussions and resulting action to change have emerged. We are now standing together with a shared vision for our system and with a desire for change that will result in improved public safety and a better community. That is not to say that challenges surrounding the adversarial nature of our system and political interests do not remain, but there is a shift in how those differences are communicated, considered and addressed.

I remain firmly committed to moving Milwaukee’s release decision-making process and pretrial services programs to an evidence-based, best practice platform regardless of whether we are selected to participate in Phase III of the initiative. Our community deserves that commitment. I plan to continue in my capacity as a member of the Policy Team and I pledge the full cooperation of my office and both of Milwaukee County’s pretrial services providers to the critical work of Phase III.

Thank you for your consideration of our application.

Sincerely,

Holly Szablewski

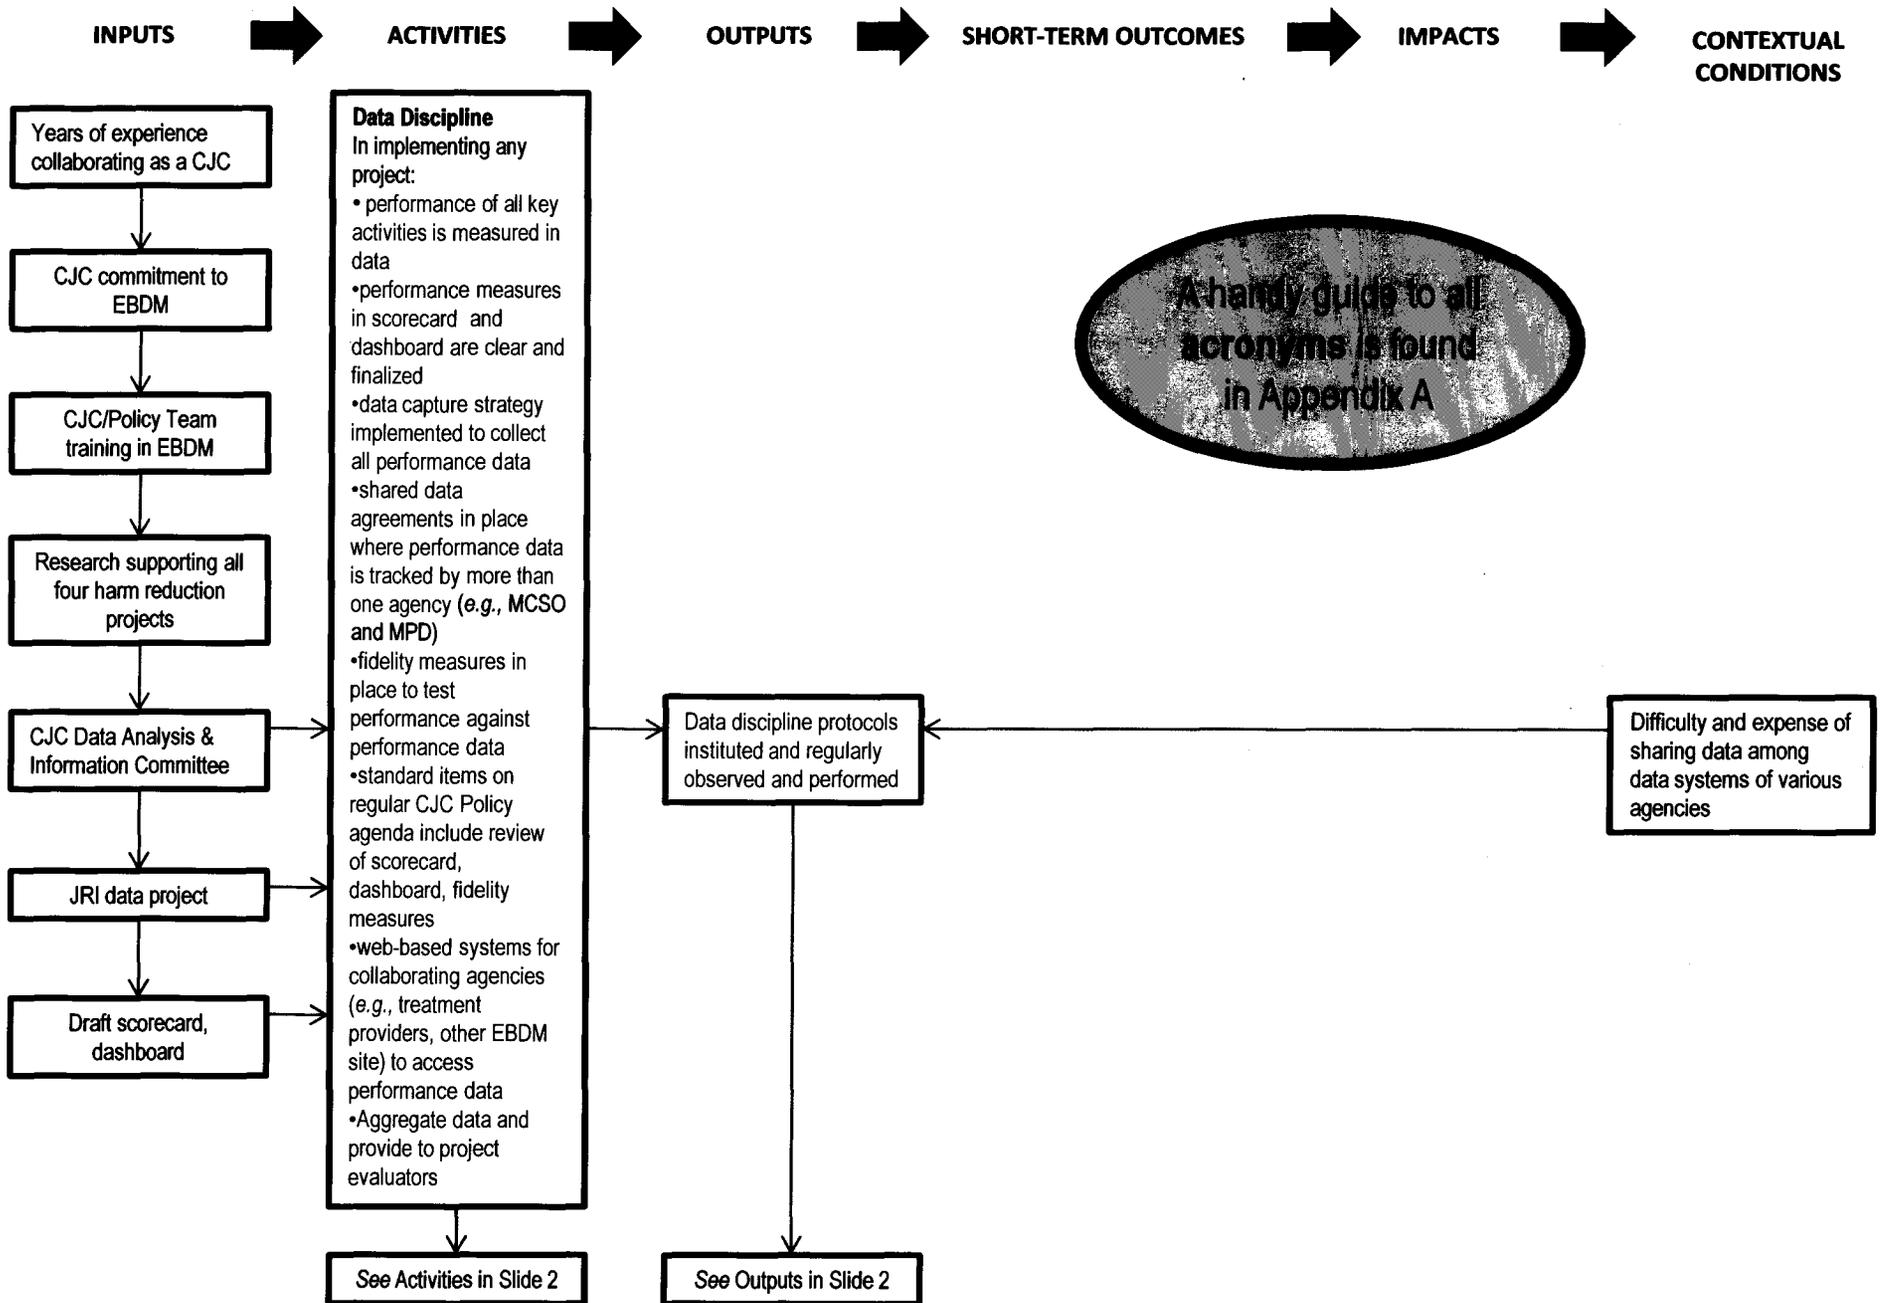

Milwaukee County Judicial Review Coordinator

EBDM PHASE III PROPOSAL SCORING TOOL

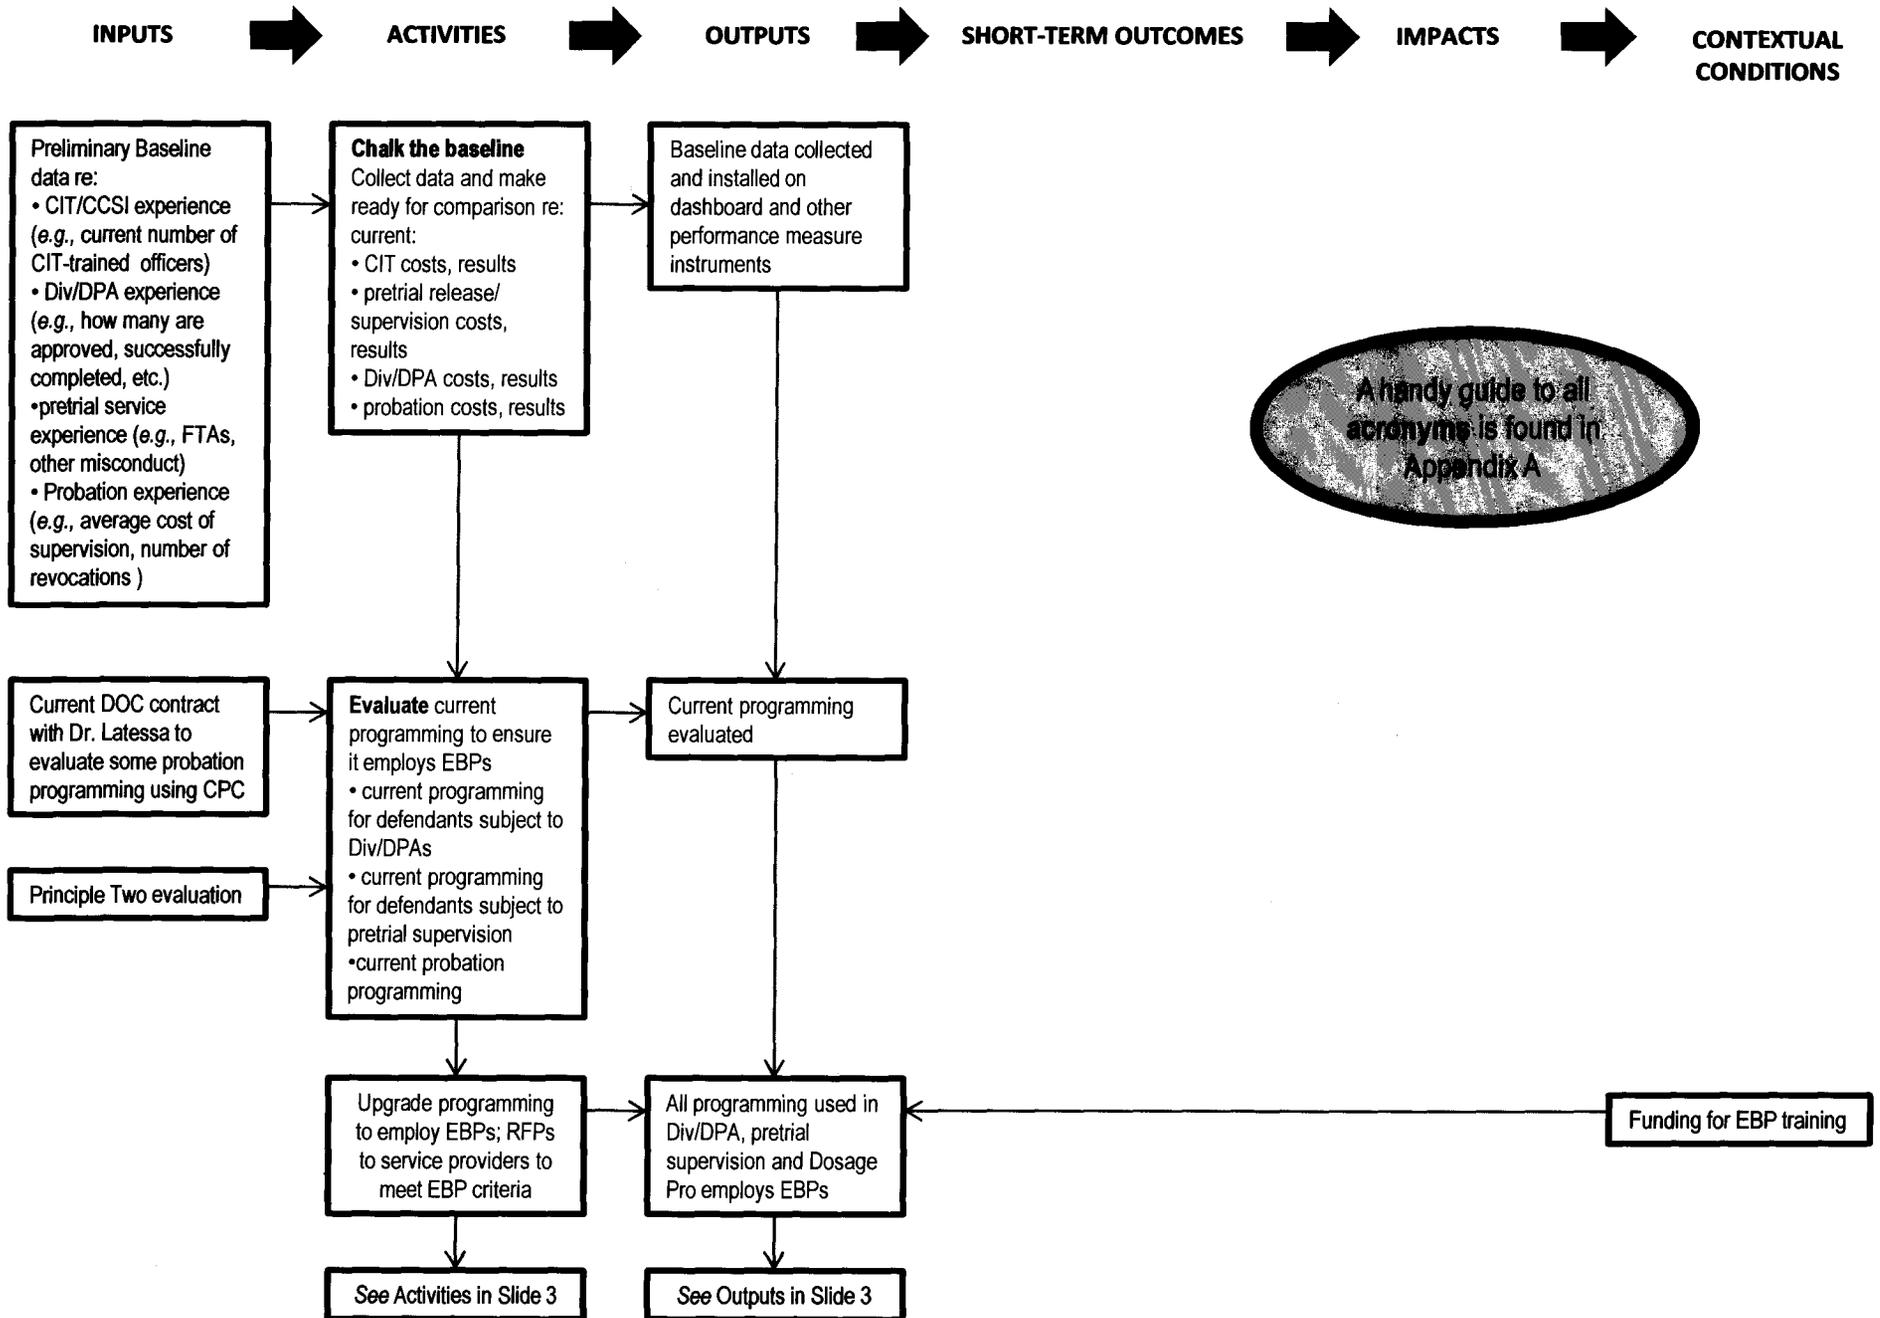

Criteria	Scale	Default Weight in Relation to Overall Score
<p>Integrity</p> <ul style="list-style-type: none"> How closely does this proposal tie into the vision statement (stewardship/ reducing recidivism/collaboration/harm reduction, etc.)? 	<p>1 = whether it's a good idea or not, it's just not a strong example of EBDM principles at work</p> <p>10 = epitome of EBDM principles at work, and especially useful in addressing the issues the criminal justice system in Milwaukee County needs to tackle</p>	14.285%
<p>Predictability</p> <ul style="list-style-type: none"> To what extent does existing research suggest the proposal will be successful? 	<p>1 = in essence, the proposal is a hypothesis that hasn't been tested anywhere else we know of</p> <p>10 = solid research show this has been a winner in similar circumstances in other jurisdictions</p>	14.285%
<p>Novelty</p> <ul style="list-style-type: none"> How innovative is the proposal? 	<p>1 = it may be somewhat embarrassing to have to explain why we aren't doing this already</p> <p>10 = someday someone will call this "the Milwaukee _____"</p>	14.285%
<p>Supportability</p> <ul style="list-style-type: none"> To what extent do we have baseline data about the issue the proposal addresses, and to what extent do we have data collection systems in place that will help us track progress and success (or lack of it)? 	<p>1 = considerable effort will be needed to collect data about (1) existing practices and (2) the results of the project as we implement it</p> <p>10 = current, easily accessible data about our practices already exists and data collection systems are already in place that we can use to track progress</p>	14.285%
<p>Impressiveness</p> <ul style="list-style-type: none"> How big a hit will this be if it's successful? 	<p>1 = barely worth the effort</p> <p>10 = candidates for public office will jockey to take credit for this idea</p>	14.285%

<p>Scorability</p> <ul style="list-style-type: none"> • How measurable are the projected results? Can the results be evaluated in terms of our overall scorecard? 	<p>1 = the aspirations of the proposal are not quantified and the proposal makes no suggestion of how they might be</p> <p>10 = the proposal contains a specific, quantified estimate of costs savings, reduction in recidivism, harm reduction, etc., and a firm methodology for conducting future measurements of actual performance as against the estimate</p>	<p>14.285%</p>
<p>Feasibility</p> <ul style="list-style-type: none"> • Do we have the financial and infrastructure capacity to implement the proposal immediately or must additional resources be sought? 	<p>1 = it is unlikely that necessary budgetary resources can be obtained, or necessary infrastructure developed, or both</p> <p>10 = no additional budgetary resources or infrastructure is needed to implement the proposal</p>	<p>14.285%</p>

Phase III Work Plan to Achieve Harm Reduction Goals

CIT/CIP/CCSI

Key Decision Points:

Harm Reduction Goals:

- 1) *Reduce by 25% the number of people with mental health needs who lose their benefits due to being jailed for 20 days or more*
- 2) *Increase by 25% the number of individuals with mental health needs who are reconnected to the services they need within 20 days after arrest*

Objective 1: Increase from 18% to 25% the proportion of MPD¹ officers who receive CIT training so that there are CIT-trained officers on every shift in every district

		Dates that Action Steps are Undertaken and Completed	Lead Person	Others Responsible	Resource Needs	Partner Coordination
Action Step 1:	Develop preliminary agency-level and case-level logic models for MPD	August 1, 2011 to October 1, 2011	Tom Reed Asst. Chief Harpole	CIT Implementation Team		
Action Step 2:	Identify current percentage of CIT-trained officers	August 1, 2011	Asst. Chief Harpole		NAMI training	CJC
Action Step 3:	Develop data reporting link between MPD and EBDM Policy Team to regularly update report of percentage of CIT-trained officers	August 1, 2011 to October 1, 2011	Tom Reed Asst. Chief Harpole	EBDM Policy Team, CIT Implementation Team	IT support	
Action Step 4:	Establish training schedule to reach 25% goal	September 1, 2011	Asst. Chief Harpole	CIT Implementation Team	NAMI training	
Action	Strengthen	October 1,	Asst. Chief	CIT		

¹ A handy glossary spelling out the acronyms used throughout this application may be found in Appendix A.

Step 5:	recruiting for CIT training, including creating internal rewards	2011	Harpole	Implementation Team		
Action Step 6:	Establish coverage for each district/shift	November 1, 2011 to December 1, 2012	Asst. Chief Harpole	CIT Implementation Team	NAMI training	
Action Step 7	Develop a data system to track CIT Activity including: number of non-criminal interventions produced by CIT Policing, and number of CIT contacts	November 1, 2011 to December 1, 2012	Asst. Chief Harpole	CIT Implementation Team	NAMI, IT	
Action Step 8:	Report progress to Policy Team to update Scorecard and Dashboard	August 1, 2011 to December 1, 2012	Asst. Chief Harpole	CJC Data & Information Committee, Policy Team, CIT Implementation Team	Date/IT Resources	
Potential Barriers:	<ul style="list-style-type: none"> • Reduced MPD budget, especially in training resources • Gaps in coverage among shifts and districts 					
Strategies to Address Barriers:	<ul style="list-style-type: none"> • Seek outside funding to support NAMI training • Phase in full coverage; focus on districts with highest need 					
Objective 2:	Reduce arrests and emergency detentions ("EDs") of chronic consumers ("CCs") by 20%					
		Dates that Action Steps are Undertaken and Completed	Lead Person	Others Responsible	Resource Needs	Partner Coordination
Action Step 1:	Develop preliminary agency-level and case-level logic models for MPD	September 1, 2011 to November 1, 2011	Tom Reed Asst. Chief Harpole	CIT Implementation team		Policy Team
Action Step 2:	See Action Steps 1-6 under Objective 1					
Action	Develop	October 1,	Asst. Chief	CIT	NAMI	

Step 3:	protocol for dispatchers to follow in gathering mental health information to support CIT-trained officers	2011 to December 1, 2011	Harpole	Implementation Team	training	
Action Step 4:	Train dispatchers to gather mental health information useful to CIT-trained officers	October 1, 2011 to November 1, 2011	Asst. Chief Harpole	CIT Implementation Team	NAMI training	
Action Step 5:	Design pilot system for identifying CCs in a selected police district, including criteria of identifiable traits of CCs	December 1, 2011 to March 1, 2012	Tom Reed Asst. Chief Harpole	BHD CJC Data & Information Committee	NAMI training	BHD
Action Step 6:	Develop database to apply criteria to CCSI target population	December 1, 2011	Tom Reed Asst. Chief Harpole	CJC Data & Information Committee	Data/IT resources	BHD
Action Step 7:	Develop data link to CIT-trained officers in pilot district to relay information about CCs	December 1, 2011	Asst. Chief Harpole		Data/IT resources	
Action Step 8:	Develop pilot list of CCs	January 1, 2012	Asst. Chief Harpole	CIT Implementation Team	NAMI training	BHD MCSO
Action Step 9:	Determine baseline information regarding rate of arrest, EDs and recidivism of CCs	January 1, 2011 to January 1, 2012	Tom Reed Asst. Chief Harpole	CIT Implementation Team	MPD, MCSO, CCAP data	MCSO
Action Step 10:	Determine baseline information regarding costs associated with CCs – cost of EDs,	January 1, 2011 to January 1, 2012	Tom Reed Asst. Chief Harpole	CIT Implementation Team	MPD, MCSO data	BHD MCSO

	incarceration and medical and mental health care					
Action Step 11:	Work with advocates for persons with mental illness to develop protocols to resolve any civil liberty concerns with selecting some citizens for heightened police attention and implement protocols	January 1, 2012 to March 1, 2012	Tom Reed Asst. Chief Harpole	CIT Implementation Team	NAMI	BHD
Action Step 12:	Relay pilot list of CCs to CIT-trained officers in pilot district	January 15, 2012	Asst. Chief Harpole		Data/IT resources	
Action Step 13:	Track CCs on pilot list <ul style="list-style-type: none"> • Collect observations and data from CIT-trained officers • Collect data from MCSO and BHD regarding cost of ED, incarceration and medical and mental health care for CCs • Collect data from MCSO and BHD regarding rate of arrest, recidivism and EDs of CCs 	January 15, 2012 to December 1, 2013	CIT Implementation Team	BHD MCSO CJC Data & Information Committee	Data/IT Resources	BHD MCSO
Action	Compare results	December	CIT			

Step 14:	to date with baseline and arrange independent evaluation of project	1, 2013 to March 1, 2014	Implementation Team			
Action Step 15:	Report progress to Policy Team to update Scorecard and Dashboard	January 15, 2012 to December 1, 2013	Asst. Chief Harpole	CIT Implementation Team	Date/IT Resources	BHD MCSO
Potential Barriers:	<ul style="list-style-type: none"> • Developing data links between MPD and BHD computer systems • Civil liberties concerns about selecting certain citizens for special treatment 					
Strategies to Address Barriers:	<ul style="list-style-type: none"> • Apply techniques proven successful in linking MPD and MCSO booking data • Involve mental health advocates in implementing work plan 					
Objective 3:	Place 50 more cases involving persons with mental illness in Div/DPA within 18 months					
		Dates that Action Steps are Undertaken and Completed	Lead Person	Others Responsible	Resource Needs	Partner Coordination
Action Step 1:	See Action Steps under Objective 1 in Div/DPA Work Plan; follow each of the steps with a particular focus on persons with mental illness					
Action Step 2:	See Action Steps 1-6 under Objective 1 above					
Action Step 3:	Develop preliminary agency-level and case-level logic models for the Alternatives Team	September 1, 2011 to November 1, 2011	CIT Implementation Team	Alternatives Team		
Action Step 4:	Determine baseline information regarding number of cases involving	November 1, 2011 to November 1, 2012	CIT Implementation Team			

	persons with mental illness that are referred for Div/DPA, approved for Div/DPA and successfully completed					
Action Step 5:	Establish Crisis Intervention Partners ("CIP") structure in jail to coordinate collection and sharing of information with CIT-trained officers	November 1, 2011 to March 1, 2012	CIT Implementation Team	John Chisholm Alternatives Team J2K Universal Screening		MPD MCSO J2K
Action Step 6:	Train CIP personnel in jail to coordinate collection and sharing of information with CIT-trained officers	December 1, 2011 to March 1, 2012	Insp. Schmidt	CIT Implementation Team, NAMI	MCSO Training resources, IT	
Action Step 7:	Jail screeners flag cases involving defendants arrested by CIT officers, for consideration for Div/DPA	December 1, 2011 to March 1, 2013	J2K	Alternatives Team MPD, MCSO	IT	Courts J2K DA SPD MPD
Action Step 8:	Track cases involving defendants arrested by CIT officers to determine how many are referred for Div/DPA, how many Div/DPAs are approved and how many are successfully completed	December 1, 2011 to June 1, 2013	J2K	Alternatives Team, CIT Implementation Team	SJC Data & Information Committee, J2K IT	
Action	Report progress	December	CIT	BHD	Data/IT	BHD

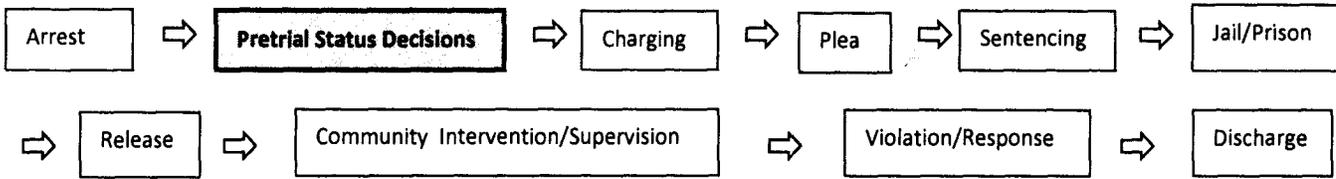

Step 9:	to Policy Team to update Scorecard and Dashboard	1, 2011 to June 1, 2013	Implementation Team	MCSO CJC Data & Information Committee Policy Team	Resources	MCSO
Objective 4:	Within 20 days of arrest, 25% more defendants with mental health issues who receive housing, other benefits and services are released to continue community based placements; within 20 days of arrest, those without current behavioral health division services are (re)connected					
		Dates that Action Steps are Undertaken and Completed	Lead Person	Others Responsible	Resource Needs	Partner Coordination
Action Step 1:	Develop preliminary agency-level and case-level logic models –CIT, MCSO, Universal Screening and BHD	September 1, 2011 to November 1, 2011	CIT Implementation		IT, BHD	
Action Step 2:	See Action Steps 5-8 of Objective 3					
Action Step 3:	Identify if arrested defendants are receiving benefit services or have housing- confirm continued availability	March 1, 2012	MCSO, J2K, BHD	Pretrial Services, Community Service Providers, Mental Health Task Force	IT, BHD	
Action Step 4:	Assess arrested defendants without services prior to initial appearance	March 1, 2012 to December 1, 2012	MCSO, J2K, BHD, DA, PD, Courts	Walter Laux (BHD)	IT, BHD	
Action Step 5:	Refer to appropriate community service provider	March 1, 2012 to December 1, 2012	MCSO, J2K, BHD, DA, PD, Courts	Walter Laux (BHD)	IT, BHD	
Action Step 6:	Use pretrial release programming to monitor and connect to services- data capture	March 1, 2012 to December 1, 2012	MCSO, J2K, BHD, DA, PD, Courts	Walter Laux (BHD)	IT, BHD	
Action	Capture data on	March 1,	MCSO, J2K,	Walter Laux	IT, BHD, J2K	

Step 7:	the number of arrested defendants who were connected to services or housing and the length of time for connection to occur	2012 to December 1, 2012	BHD, DA, PD, Courts	(BHD)		
Action Step 8:	Report progress to Policy Team to update Scorecard and Dashboard	March 1, 2012 to December 1, 2013	CIT Implementation Team	BHD MCSO CJC Data & Information Committee Policy Team	Data/IT Resources	BHD MCSO

Phase III Work Plan to Achieve Harm Reduction Goals

Universal Screening

Key Decision Points:

Harm Reduction Goals:

- 3) \$1,000,000 decrease in jail operating costs by 2013 (System Costs)
- 4) 40% reduction in the rate of pretrial misconduct by 2013 (Public Safety)

Objective 1:

100% of defendants subject to appearance and bail setting in ICCR will be screened using a pre-screen or pretrial risk instrument (Universal Screening)

		Date of Completion	Lead Person	Others Responsible	Resource Needs	Partner Coordination
Action Step 1:	Develop Agency & Case Level Logic Models	June 1, 2011-July 31, 2011	Holly Szablewski	-Justice 2000 -Courts -WCS	Staff time	-Justice 2000 -Courts -WCS
Action Step 2:	Select Pre-Screening Tool	May 1, 2011-July 31, 2011	Holly Szablewski	-Justice 2000 (Mark Rosnow, Nick Sayner, Ed Gordon) -Possibility to coordinate with MCPRAI validation study	Staff time	-Courts -Justice 2000
Action Step 3:	Develop curriculum and select faculty for risk tool training	June 1, 2011-Ongoing	Holly Szablewski	-Justice 2000 -WCS -DA -SPD -Courts -MPD -MCSO	Staff time Technical assistance Funding	
Action Step 4:	Train 100% of PTS staff on how to use tool(s)	Ongoing	-Nick Sayner -Sara Carpenter	-Justice 2000 & WCS supervisory staff	Staff time	-Justice 2000 -WCS
Action Step 5:	Train DA, PD, Victim Witness, MCSO, DOC, PTS Judges, MPD, Commissioners on Risk Assessment,	Ongoing (-1 st session complete 12/2010. -2 nd session complete)	Holly Szablewski	NA	Technical Assistance/ Funding for future training	-Courts- -DA -SPD

	EBDMI/EBPs	5/2011)				
Action Step 6:	Validate MCPRAI Implement use of Pretrial OWI Risk Tool ²	May 1, 2011-July 31, 2011	Holly Szablewski	-Dr. Christopher Lowenkamp, - Dr. Marie VanNostrand -Justice 2000- (Mark Rosnow)	Courts have executed contract for completion of work	-Justice 2000 -WCS -Courts
Action Step 7:	Develop local risk-based Praxis (terms, conditions of release & level of supervision based on risk/need/charge)	June 1, 2011-July 31, 2011	Holly Szablewski	-Dr. Marie VanNostrand (contract has been executed) -Universal Screening Work Group	Courts have contracted with Dr. Marie VanNostrand. Development session completed on 6/20.	-Courts -DA -SPD -Justice 2000
Action Step 8:	Develop curriculum and select faculty for Praxis training	June 1, 2011-Ongoing	Holly Szablewski	-Justice 2000 -WCS -DA -SPD -Courts -MPD -MCSO	Staff time Technical assistance Funding	
Action Step 9:	Train PTS staff and system stakeholders on application of Praxis	July 1, 2011-Ongoing	Holly Szablewski	-Dr. Marie VanNostrand	Courts have executed contract w/Dr. VanNostrand	-Courts -DA -SPD -Justice 2000 -WCS - Law Enforcement
Action Step 10:	Develop Pretrial Risk Assessment Report (PRAR) (format, content)	June 1, 2011-July 31, 2011	Holly Szablewski	-Universal Screening Work Group	Staff Time	-Justice 2000
Action Step 11:	Execute MOU with MCSO on inter-facility movement of pretrial inmates	July 1, 2011-July 31, 2011	Holly Szablewski	-MCSO (Inspector Richard Schmidt Inspector Kevin Nyklewicz)	Staff time	-Courts -MCSO -Justice 2000
Action Step 12:	Develop Data Collection and Reporting Protocol for outcomes and future risk tool validation studies	July 1, 2011-July 31, 2011	Holly Szablewski	-Universal Screening Work Group -Justice 2000- (Mark Rosnow, Nick Sayner WCS IT Staff)	Staff time	-Courts -WCS -Justice 2000 -MCSO -CCAP

² Pretrial risk assessment instrument specific to OWI offenders designed by Dr. Marie VanNostrand through a project funded by the Wisconsin Department of Transportation and Wisconsin Community Services. Project completed in May, 2011. Instrument will be used to screen all OWI arrestees.

Action Step 13:	Develop protocol for use of the PRAR in decision making	July 1, 2011- August 31, 2011	Holly Szablewski	-Jeff Altenburg -Paige Styler -Courts -Justice 2000	Staff time	-Courts -DA -SPD - Justice 2000 -WCS
Action Step 14:	Implement pilot universal screening @ CCFC	January 1, 2011- September 1, 2011	Holly Szablewski	-Justice 2000 (Nick Sayner/Ed Gordon)	Staff to conduct screening	-Courts -DA -SPD MCSO -Justice 2000
Action Step 15:	Implement pilot book/screening/ bail/release project @ MPD District Station (Identify low-risk arrestees who can safely be released and ordered to appear.)	June 1, 2011- January 1, 2012	MPD	-Jeff Altenburg -Holly Szablewski -Nick Sayner -SPD MCSO	Funding for screening positions Screening space Computers Phones	-Courts -DA -SPD -Justice 2000
Action Step 16:	Establish fidelity measures to insure adherence to EBPs in Praxis/risk tool completion and application	July 31, 2011- September 1, 2011	Justice 2000- (Nick Sayner/Ed Gordon) Courts	-Courts -DA -SPD	Staff time	
Action Step 17:	Measure fidelity to EBPs in Praxis/risk tool completion and application	September 1, 2011- January 1, 2012	Justice 2000- (Nick Sayner/Ed Gordon) Courts	-Courts -DA -SPD	Staff time	
Action Step 18:	Create a plan to use outcome data to message the success of the program both in the public and among stakeholders.	September 1, 2011 to May 1, 2012	DA SPD Courts	DA SPD Courts CJC	Staff time	
Action Step 19:	Implement full universal screening	September 1, 2011- January 1, 2012	Holly Szablewski	-Justice 2000 (Nick Sayner/Ed Gordon)	Staff to conduct screening	-Courts -DA -SPD MCSO -Justice 2000
Potential Barriers:	-Funding-need funding to support staffing level to screen all arrestees who will appear in In-Custody Intake Court					

	-Stakeholder buy-in					
Strategies to Address Barriers:	-JRI-use project to identify cost-benefit of program and support funding request(s) -Conduct training for all stakeholders on pretrial risk assessment. Provide jurisdictional examples where universal screening has been implemented and had positive impact on system/jail.					
Objective 2:	Decrease of 10% in the average length of jail stay for pretrial detainees by 2013					
		Date Action Steps Undertaken & Completed	Lead Person	Others Responsible	Resource Needs	Partner Coordination
Action Step 1:	Determine Milwaukee County's annual pretrial detention costs past 5 years	June 1, 2011-July 31, 2011	DAS-Fiscal	DAS MCSO Co. Board Analyst	Staff time Annual Budget Info	-DAS-Fiscal -MCSO Fiscal -Co. Board
Action Step 2:	Establish accurate cost per day for pretrial detainees	June 1, 2011-July 31, 2011	DAS-Fiscal MCSO-Fiscal	DAS-Fiscal MCSO-Fiscal Co. Board Analyst	Staff time	-DAS-Fiscal -MCSO Fiscal -Co. Board
Action Step 3:	Determine ALOS for pretrial population for ea. of past 5 years.	June 1, 2011-July 31, 2011	MCSO Special Projects	IMSD	IMSD staff and MCSO Special Projects Team staff time	-IMSD -MCSO Special Projects -CJC Data Committee
Action Step 4:	Develop protocol for reporting ALOS information to CJC on consistent basis	June 1, 2011-July 31, 2011	MCSO Special Projects	IMSD	IMSD staff and MCSO Special Projects Team staff time	-IMSD -MCSO Special Projects -CJC Data Committee
Action Step 5:	See objective #1- Universal Screening					
Potential Barriers:	Various "cost-per-day" figures used over the years. No system-wide agreement Currently no baseline data for comparison -Staff resources -Agreeing on an acceptable, achievable level of reduction (applies to this and next 2 objectives.)					
Strategies to Address Barriers:	-Utilize national cost-per day average (\$60-\$65?) -CJC and Co. Board need this data to evaluate effectiveness of Universal Screening, for budgeting purposes, long-range planning for bed utilization. -Engage MCSO Special Projects Team and IMSD to develop plan to obtain baseline data and collect and report information on regular basis going forward.					
Potential Barriers:	Availability of data Staff resources Obtaining system-wide stakeholder consensus in establishing a target jail capacity for pretrial defendants					
Strategies to Address Barriers:	-Engage CJC and Co. Board in long term strategic plan for correctional bed utilization -Engage MCSO Special Projects Team and IMSD to develop plan to obtain baseline data and collect and report information on regular basis going forward.					
Objective 3:	Decrease of 15% in the average daily pretrial population by 2013					
		Date of	Lead	Others	Resource	Partner

		Completion	Person	Responsible	Needs	Coordination
Action Step 1:	Determine ADP for pretrial population for ea. of past 5 years.	June 1, 2011-July 31, 2011	MCSO Special Projects	IMSD	IMSD staff and MCSO Special Projects Team staff time	-IMSD -MCSO Special Projects -CJC Data Committee
Action Step 2:	Develop protocol for reporting ADP information to CJC on consistent basis	June 1, 2011-July 31, 2011	MCSO Special Projects	IMSD	IMSD staff and MCSO Special Projects Team staff time	-IMSD -MCSO Special Projects -CJC Data Committee
Action Step 3:	See objective #1- Universal Screening Pilot					
Potential Barriers:	Availability of data Staff resources Obtaining system-wide stakeholder consensus in establishing a target jail capacity for pretrial defendants					
Strategies to Address Barriers:	-Engage CJC and Co. Board in long term strategic plan for correctional bed utilization -Engage MCSO Special Projects Team and MSD to develop plan to obtain baseline data and collect and report information on regular basis going forward.					
Objective 4:	75% decrease in number of low risk defendants detained pretrial by 2013					
		Date of Completion	Lead Person	Others Responsible	Resource Needs	Partner Coordination
Action Step 1:	Phase II Pretrial Jail Population Analysis (Determine baseline risk composition of current population)	September 1, 2011- December 31, 2011	Holly Szablewski		Funding for analysis	-Courts -MCSO -CJC -County Board -PJI?
Action Step 2:	See objective #1- Universal Screening					
Potential Barriers:	-Availability of funding/TA for this level of analysis -Stakeholder agreement on definition of "low risk" -Excessive, inappropriate use of overrides in application of Praxis					
Strategies to Address Barriers:	-Stakeholder training on risk assessment, application of the "risk principle", appropriate and effective methods for mitigation of risk -Develop clear policies for use of overrides. Collect data on number and reason for overrides. -CJC & County Board develop strategic plan for correctional bed utilization					
Objective 5:	50% decrease in pretrial failure to appear rate by 2013					
		Date of	Lead	Others	Resource	Partner

		Completion	Person	Responsible	Needs	Coordination
Action Step 1:	Establish baseline jurisdictional FTA rate by case type and release type	June 1, 2011-December 31, 2011	Holly Szablewski	CJC Data Committee Justice 2000	Staff time FTA data	-CCAP
Action Step 2:	Develop protocol to track and report this data on a regular basis	June 1, 2011-December 31, 2011	" "	CJC Data Committee	Staff time	-CCAP -IMSD
Action Step 3:	See objective #1 Universal Screening					
Potential Barriers:	-Uncertain whether all of the data needed to measure FTA by case type and release type can be extracted in a method to determine baseline rate. -Data contained in multiple, separate data systems.					
Strategies to Address Barriers:	-CJC Data Committee review systems to determine if data elements necessary exist, in which systems and whether it can be extracted to establish an accurate baseline rate. -Modification of current data/information systems to address key measures of universal screening					
Objective 6:	10% reduction in pretrial rearrest rate by 2013					
		Date of Completion	Lead Person	Others Responsible	Resource Needs	Partner Coordination
Action Step 1:	Establish baseline pretrial rearrest rate by case and release type.	June 1, 2011-Dec 31, 2011	Holly Szablewski	CJC Data Committee Justice 2000 WCS	Staff time FTA data	-CCAP -IMSD -CJC
Action Step 2:	Develop protocol to track and report this data on a regular basis	June 1, 2011-December 31, 2011	" "	CJC Data Committee Justice 2000 WCS	Staff time	-CCAP -IMSD
Action Step 3:	See objective #1-Universal Screening					
Potential Barriers:	-Uncertain whether all of the data needed to measure pretrial rearrest rate by case type and release type can be extracted in a method to determine baseline rate. -Data is contained in multiple information systems that are not currently integrated					
Strategies to Address	-CJC Data Committee review systems to determine if data elements necessary exist, in which systems, and whether it can be extracted to establish an accurate baseline rate.					

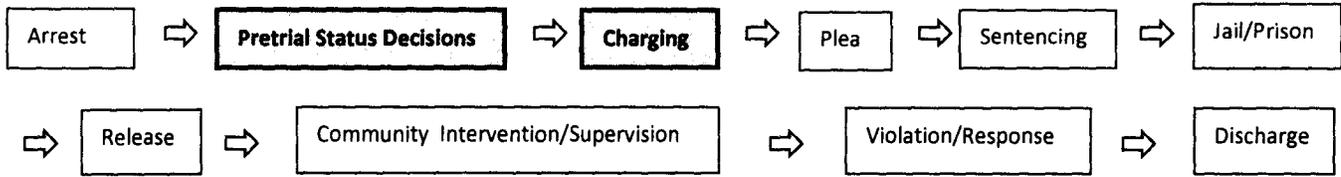

Barriers:	-Modification of current data/information systems.					
Objective 7:	90% of defendants released pretrial will successfully meet conditions					
		Date of Completion	Lead Person	Others Responsible	Resource Needs	Partner Coordination
Action Step 1:	Clearly define pretrial success	May 1, 2011-July 30, 2011	-Universal Screening Work Group		-Staff time	-Courts -DA -SPD -Justice 2000
Action Step 2:	Analyze current information systems to determine if data is available to measure	May 1, 2011-July 31, 2011	-CJC Data Committee	-IMSD -CCAP -Court Admin -DA -Justice 2000 -WCS	-Staff time	-IMSD -MCSO -CCAP -Courts -DA -Justice 2000 -WCS
Action Step 3:	Develop plan for collection and reporting of data	May 1, 2011-July 30, 2011	-CJC Data Committee	-IMSD -CCAP -Justice 2000 -WCS	Staff Resources Funding- information system development and modification	
Action Step 4:	See objective #1- Universal Screening					
Potential Barriers:	-Data/information is likely contained in multiple information systems that are not currently integrated. -Coming to agreement among all stakeholders as to how to define pretrial success.					
Strategies to Address Barriers:	-Modification of existing data/information systems to allow for collection and reporting of this data. -Review definitions other jurisdictions are using.					
Objective 8:	Annually train 80% of stakeholder agency staff on EBDM, EBPs, Risk Assessment and Application of Praxis					
		Date of Completion	Lead Person	Others Responsible	Resource Needs	Partner Coordination
Action Step 1:	Develop training curriculum	July 1, 2011-January 1, 2012	Holly Szablewski	-Jeff Altenburg -Paige Styler -Nick Sayner -Courts -Victim Witness Staff	Staff time	-DA -SPD -Courts -MCSO -V/W -MPD -PTS
Action Step 2:	Gather supporting materials	Ongoing	Holly Szablewski	-DA -SPD -Courts -Justice 2000	Staff time	-DA -PD -Courts -MCSO -V/W -MPD -PTS
Action Step	Identify training	January 1,	Holly	-Jeff Altenburg	Staff time	

3:	faculty	2012	Szablewski	-Paige Styler -Nick Sayner -Court Admin		
Action Step 4:	Identify agency staff in need of training	Ongoing	Agency Leaders	-All stakeholder agencies -Agency leaders	Staff time	-DA -SPD -Courts -MCSO -V/W -MPD -PTS
Action Step 5:	Establish training schedule	Ongoing	Holly Szablewski	-Jeff Altenburg -Paige Styler -Nick Sayner -Court Admin	Staff time	-DA -PD -Courts -MCSO -V/W -MPD -PTS
Potential Barriers:	-Obtaining stakeholder agency commitment to participate in annual training -Staffing shortages and demanding schedules make attendance at training difficult/onerous.					
Strategies to Address Barriers:	-Establish regular annual training schedule -Piggyback on already scheduled agency training/in-service programs					

Phase III Work Plan to Achieve Harm Reduction Goals

Diversion/DPA

Key Decision Points:

Harm Reduction Goals:

- 1) *Reduce the number of offenders serving time in jail, resulting in the closing of another dorm at the House of Correction (the Div/DPA³ program already spares Milwaukee County about a dorm-and-a-half worth of bed-days), resulting in savings of \$350,000 (System Costs)*
- 2) *Reduce recidivism by offenders subject to diversion and deferred prosecution by 10%*

Objective 1:

Increase the number of low- to moderate-risk offenders screened and accepted into the Diversion/DPA Program by 10% by May 1, 2012 through the implementation of appropriate evidence based tools to screen and identify both short term and longer term risk and needs leading to:

- 130 fewer cases in the system, corresponding to number of successful Div/DPAs
- 75 fewer probation sentences, corresponding to increase in number of successful DPAs
- 10% fewer jail bed-days by offenders for whom a Div/DPA is approved
- 15% fewer arrests resulting in new charges during diversion/deferral period

		Dates that Action Steps are Undertaken and Completed	Lead Person	Others Responsible	Resource Needs	Partner Coordination
Action Step 1:	Clarify vision/ purpose of the Diversion/DPA Program consistent with the risk/needs research and available risk assessment tools	September 1, 2011 to October 1, 2011	DA SPD	J2K, Courts, DOC, BHD	Realign with existing resources and expand with JRI	CJC
Action Step 2:	Develop Diversion/ DPA Policy and Procedures Team consisting of a representative of the Courts, DOC, MPD, MCSO, DA, SPD, Clerk of Circuit Court, J2K, the Milwaukee	September 1, 2011 to October 1, 2011	DA SPD	Alternatives Team		IT designee

³ A handy glossary spelling out the acronyms used throughout this application may be found in Appendix A.

	County Behavioral Health Division ("BHD") and Community Programming Providers (the "Alternatives Team")					
Action Step 3:	Develop agency- and case-level logic model for Alternatives Team and member agencies	September 1, 2011 to October 1, 2011	DA SPD	Alternatives Team		
Action Step 4:	Gather and review data on current and previous participants to determine current demographics of Div/DPA participants to: 1) determine current success/failure rate of program participants; 2) determine recidivism rates for program participants 3 years after sentencing (failures) and completion of Agreements (successes); 3) evaluate current programming and 4) determine which offenders should be targeted in the future and which programming is appropriate for them; determine data gaps and implement means to close them	September 1, 2011 to November 1, 2011	J2K Courts	Alternatives Team	Access to data and interpretation /computer software	
Action Step 5:	Determine Primary Target Population by pretrial risk score category for: a) Diversions b) DPAs c) Drug Treatment Court d) cases	September 1, 2011 to December 1, 2011	DA SPD	Alternatives Team	Access to data/outside technical assistance	

	appropriate for expunction, d) others (e.g., Milwaukee County Day Reporting Center ("DRC"))					
Action Step 6:	Determine Eligibility/Exclusionary Criteria for: a) Diversions b) Deferred Prosecution Agreements c) Drug Treatment Court d) cases appropriate for expunction e) others	September 1, 2011 to December 1, 2011	DA	Alternatives Team	Access to data/outside technical assistance	
Action Step 7:	Determine Sanctions/Incentives for a) Diversions b) Deferred Prosecution Agreements c) Drug Treatment Court d) cases appropriate for Expunction, d) others	September 1, 2011 to December 1, 2011	J2K DOC Courts	Alternatives Team	Technical Assistance/ access to data	
Action Step 8:	Determine whether to use LSI-R or COMPAS along with a more in-depth AODA/MH screening to measure long-term recidivism and criminogenic needs ("CN screen")	September 1, 2011 to January 1, 2012	DOC J2K Courts	Alternatives Team	DOC/Court/J2K resources JRI process	CJC
Action Step 9:	Determine criteria that will be used to identify (using EDBM principles and LEBPs) which arrestees will be screened with CN Screen	September 1, 2011 to January 1, 2012	J2K Courts	Alternatives Team	Staff time	
Action Step 10:	Develop layout and content of assessment report	December 1, 2011 to January 15, 2012	J2K Courts	Alternatives Team		
Action Step 11:	Hire and train staff to conduct assessments	January 1, 2012 to February 15, 2012	J2K Courts	Alternatives Team	Funding	
Action Step 12:	Establish a protocol and timing of dissemination of assessment report to courts and parties	December 1, 2011 to January 15, 2012	J2K Courts	Alternatives Team		

Action Step 13:	Meet jointly with existing Div/DPA monitors (community agencies who supervise defendants subject to these agreements) and describe the change to a risk/need based structure for Div/DPA/Drug Court and identify which CN needs each provider is suited to address	December 1, 2011 to February 1, 2012	J2K Courts	Alternatives Team	Training/Coordination of training	
Action Step 14:	Establish a service provider/monitor referral chart which requires placements to programming which matches with participants' needs	December 1, 2011 to March 1, 2012	J2K Courts	Alternatives Team		
Action Step 15:	Determine appropriate programming dosage based on needs for: a) Diversions, b) Deferred Prosecution Agreements, c) Drug Treatment Court, d) cases appropriate for expunction, e) others.	December 1, 2011 to March 1, 2012	J2K DOC Courts	Alternatives Team	Technical assistance as to dosage programming and determination of what programming is appropriate for each offender; access to data	
Action Step 16:	Determine performance measures: a) Diversions b) Deferred Prosecution Agreements c) Drug Treatment Court d) cases appropriate for expunction, d) others	November 1, 2011 to April 1, 2012	J2K	Alternatives Team	Technical assistance from NIC and access to data	
Action Step 17:	Create an Intake Referral Chart based on Action Steps 1-12 for: a) Diversions b) Deferred Prosecution Agreements c) Drug Treatment Court d) cases appropriate for expunction, d) others	November 1, 2011 to April 1, 2012	J2K Courts	Alternatives Team	Technical Assistance	

	(hereinafter, the "Alternatives Protocol")					
Action Step 18:	Train for all stakeholder agencies on Alternatives Protocol and process (DA, SPD, J2K, BHD, Courts, DOC, and other monitoring agencies)	March 1, 2012 to April 1, 2012	Courts J2K	Alternatives Team	Technical Assistance	CJC
Action Step 19:	Establish a mechanism to problem solve with affected stakeholders so that agency representatives provide insight and assistance to ensure that the program participants have their needs met	March 1, 2012 to April 1, 2012	SPD DA	Alternatives Team		
Action Step 20:	Utilize a case staffing check list to structure case staffings so that important factors are not overlooked such as triggers, high risk situations, targeting criminogenic needs, identification of strengths and incentives/ disincentives	December 1, 2011 to April 1, 2012	J2K	Alternatives Team	Technical assistance on development of form	
Action Step 21:	Collect data to determine if the programs are meeting their intended outcomes for both internal and external use. Track data to determine outcomes specified in objective above	Initial review May 1, 2012 and then ongoing	J2K Courts	Alternatives Team	IT support	
Action Step 22:	Obtain stable and expanded funding in order to achieve full success of DPA/Diversion/Drug Treatment programs	September 1, 2011 and ongoing	Courts	Alternatives Team		

Action Step 23:	Create a plan to use outcome data to message the success of the program both in the public and among stakeholders	September 1, 2011 to May 1, 2012	DA/SPD /Courts	Alternatives Teams		
Potential Barriers:	<p>(1) Lack of funding/resources to support use of risk/needs tool to determine eligibility/conditions of DPA/Diversion.</p> <p>(2) Lack of appropriate evidence-based programming to which offenders with given criminogenic needs may be referred during diversion/DPA</p> <p>(3) Getting DOC or another agency to conduct risk/needs assessment before defendant is sentenced and becomes a DOC client</p> <p>(4) Funding for a DPA/Diversion/Drug Treatment Court</p>					
Strategies to Address Barriers:	<p>(1) Work collaboratively to shift resources used at the end of the system in the front so we can effectively address client and community needs and identify mutual benefits of doing so</p> <p>(2) Working collaboratively with service providers to find evidence based programming and hold them accountable by collecting outcomes and performance data</p> <p>(3) Building a strong collaborative team which includes all agency stakeholders</p> <p>(4) Collecting data to show that it is cost-effective to conduct risk/need assessments at the beginning of an agreement so that we can address criminogenic needs to ensure successful outcomes</p> <p>(4) With stakeholder agencies, attract funding and work to shift resources so that the program can be maintained without being grant-funded</p>					

Phase III Work Plan to Achieve Harm Reduction Goals

Dosage Regulated Probation

Key Decision Points:

Harm Reduction Goals:	1) Reduce cost of probation by 50%, saving \$1,400 per offender (System Costs) 2) Reduce recidivism by probationers by 50% (Public Safety)
------------------------------	---

Objective 1:	At least 112 of 150 offenders in target sample (75%) will complete probation in less than half the time of offenders with similar risk scores who are not selected for the target sample
---------------------	---

		Dates that Action Steps are Undertaken and Completed	Lead Person	Others Responsible	Resource Needs	Partner Coordination
Action Step 1:	Form "Dosage Pro Team" to implement workplan; team to consist of designees of Chief Judge (including Judicial Review Coordinator), DA's Office, SPD ⁴ Office, DOC Division of Community Correction, Ken Streit (UW) and NIC technical adviser	September 1, 2011 to September 15, 2011	Judge Sankovitz			Chief Judge DA's Office SPD Office DOC/DCC Ken Streit/UW NIC TA
Action Step 2:	Obtain permission from DOC to conduct and share research on offenders in the project	September 15, 2011 to December 1, 2011	Judge Sankovitz	Denise Symdon Dosage Pro Team		Chief Judge NIC
Action Step 3:	Develop agency-level logic model for DOC Department of Community	September 15, 2011 to October 15, 2011	Judge Sankovitz	Dosage Pro Team		

⁴ A handy glossary spelling out the acronyms used throughout this application may be found in Appendix A.

	Corrections					
Action Step 4:	Develop agency-level logic model for courts, DA's office and SPD	September 15, 2011 to October 15, 2011	Judge Sankovitz			
Action Step 5:	Determine average and marginal costs of probation supervision; retain accountant if necessary	September 15, 2011 to December 1, 2011	Roberta Gaither Mike Williams		DOC data Subject Matter Expert Contractor	DOC
Action Step 6:	Determine average length of probation for medium- and high-risk offenders	September 15, 2011 to December 1, 2011	Roberta Gaither Mike Williams		DOC data	DOC
Action Step 7:	Determine criteria for inclusion in pilot sample (e.g., types of cases and defendants with types of criminal records that suggest criminogenic needs and suggest the defendant will be scored on COMPAS as medium- or high-risk)	September 15, 2011 to October 15, 2011	Judge Sankovitz	Dosage Pro Team	COMPAS training for Dosage Pro Team	DOC
Action Step 8:	Evaluate existing offender programming to identify programs available to probationers in Milwaukee that employ EBPs and meet criteria in dosage research; assess programming effectiveness using the Correctional Program Checklist; coordinate project purposes and plan with community programming providers	September 15, 2011 to January 15, 2012	Roberta Gaither Mike Williams	Dosage Pro Team	DOC CPC evaluation process BJA Evaluation/ Training grant	DOC BJA-grant Evaluators Community Programming Providers
Action Step 9:	Upgrade programming as necessary to address any gaps identified	January 15, 2012 to March 15, 2012	Roberta Gaither Mike Williams	Dosage Pro Team	BJA Evaluation/ Training grant	DOC Community Programming Providers

	in evaluation process (skill trainings, enhancement of programmatic approaches, etc.)					Subject Matter Expert Contractors
Action Step 10:	Develop tools, training, policies and practices for Region 3 agents assigned to supervise Dosage Pro offenders	September 15, 2011 to January 15, 2012	Roberta Gaither Mike Williams	Dosage Pro Team	Development time	
Action Step 11:	Train a subset of Region 3 agents (and their supervisors) to use one-on-one interactions with offenders as risk reduction opportunities, that is to directly provide cognitive behavioral training to supplement treatment dosage provided in programming, as well as apply EBP incentives/sanctions to guide offenders to successful – and early – probation discharge	October 15, 2011 to March 15, 2012	Roberta Gaither Mike Williams	Dosage Pro Team	BJA Evaluation/Training grant EPICS training Motivational Interviewing training Training time	DOC BJA
Action Step 12:	Develop tools, training, policies and practices for judges, district attorneys and defense counsel	September 15, 2011 to January 15, 2012	Judge Sankovitz Jeffrey Altemburg Paige Styler	Dosage Pro Team	Development time	Chief Judge District Attorney First Assistant State Public Defender
Action Step 13:	Train judges, assistant district attorneys assigned to felony court and defense counsel taking felony assignments to consider Dosage Pro condition (<i>i.e.</i> , DOC is authorized to terminate probation upon offender	January 15, 2012 to March 15, 2012	Judge Sankovitz Jeffrey Altemburg Paige Styler	Dosage Pro Team	Training time	Chief Judge District Attorney First Assistant State Public Defender

	attaining dosage) if ordering probation for defendants who meet Dosage Pro criteria					
Action Step 14:	Publish list of tentative case/defendant types that fit Dosage Pro criteria; distribute list to judges, ADAs and SPD and contracted counsel taking cases assigned to drug, gun and general felony branches; advise recipients of the pilot project and goal of identifying 300 probationers from which 150 are to be randomly selected for the project (follow with frequent reminders)	March 1, 2012 to March 15, 2012	Judge Sankovitz	Dosage Pro Team		Chief Judge District Attorney First Assistant State Public Defender
Action Step 15:	Build sample of 300 probationers <ul style="list-style-type: none"> • Counsel alerts Dosage Pro Team when, in any case fitting criteria, either side plans to recommend probation or incarceration of 8-18 months • Dosage Pro Team evaluates case and determines whether probability of a qualifying COMPAS score is high enough, and, if so, arranges for defendant to be COMPAS assessed by DOC • DOC performs COMPAS 	March 15, 2012 to September 15, 2012	Judge Sankovitz	Dosage Pro Team	DOC COMPAS-trained agents	Felony division judges Felony DAs Defense counsel taking felony cases DOC

	<p>assessment; results provided to DA, defense counsel, court, Dosage Pro team</p> <ul style="list-style-type: none"> • Judge sentences defendant • If judge orders probation <i>and</i> imposes Dosage Pro condition; <i>and</i> COMPAS score is in target range . . . • . . . then case is added to pool of 300 					
Action Step 16:	<p>Build sample of 150 probationers:</p> <ul style="list-style-type: none"> • Rolling admission • As the pool of 300 is being built, 150 cases are selected at random • <i>E.g.</i>, every time another 20 cases is added to the pool of 300, 10 are randomly selected for the pool of 150 	March 15, 2012 to September 15, 2012	Judge Sankovitz	Dosage Pro Team	DOC COMPAS-trained agents	Felony division judges Felony DAs Defense counsel taking felony cases DOC
Action Step 17:	150 probationers in sample are assigned to specially trained agents, and agent is notified of required dosage level	April 1, 2012 to October 1, 2012	Roberta Gaither Mike Williams	Dosage Pro Team		DOC
Action Step 18:	<p>Agents supervise and treat 150 offenders in sample and report to Dosage Pro Team:</p> <ul style="list-style-type: none"> • Type of programming completed, and number of hours • Number of hours of one-on-one cognitive behavioral intervention • after dosage plateau achieved, 	April 1, 2012 to September 1, 2014	Roberta Gaither Mike Williams	Dosage Pro Team	EBP programming	DOC

	<p>offender's performance on reassessments and behavioral change assessments</p> <ul style="list-style-type: none"> • Rules violations, if any • Sanctions, if any • Date of discharge 					
Action Step 19:	<p>DOC tracks other 150 offenders in the pool of 300 and reports to Dosage Pro Team:</p> <ul style="list-style-type: none"> • Type of programming completed, and number of hours • Rules violations, if any • Sanctions, if any • Date of discharge 	April 1, 2012 to September 1, 2016	Roberta Gaither Mike Williams	Dosage Pro Team		DOC
Action Step 20:	<p>Conduct booster training and continuous quality improvement for agents and supervisors</p>	January 15, 2013 to March 15, 2013	Roberta Gaither Mike Williams	Dosage Pro Team	BJA Evaluation/ Training grant Agent time	DOC
Action Step 21:	<p>Establish and apply fidelity measures to insure adherence to EBPs in programming and supervision</p>	April 1, 2012 to September 1, 2014	Roberta Gaither Mike Williams	Dosage Pro Team	BJA Evaluation/ Training grant Subject Matter Expert Contractor Agent time	DOC
Action Step 22:	<p>Dosage Pro Team aggregates, analyzes and reports performance data, including the construction of a cost simulation model to determine cost-benefits of dosage regulated probation</p>	March 1, 2016 to September 1, 2016	Judge Sankovitz	Dosage Pro Team	Staff time Subject Matter Expert Contractor	
Action Step 23:	<p>Report occasionally on progress and results of pilot, and at its conclusion:</p> <ul style="list-style-type: none"> • In internal DOC, court, DA, SPD 	March 15, 2012 to September 1, 2014	Judge Sankovitz	Dosage Pro Team	Staff time	

	<p>publications</p> <ul style="list-style-type: none"> • In trade journals in corrections, courts, criminal law • At professional conferences, for example, the ABA Annual Meeting (Judicial Division) and the annual statewide Wisconsin Supreme Court Judicial Conference • In general periodicals, including the <i>Milwaukee Journal Sentinel</i> 					
Potential Barriers:	<ul style="list-style-type: none"> • Training agents may be delayed if bid for BJA evaluation/training grant is unsuccessful • Project depends on quality of programming available in the community, but it remains to be seen for certain what the evaluation will have to say about the available programming and what, if anything, is necessary to upgrade programming • Backlash if an offender who has earned early termination commits a serious offense within the time frame during which he or she otherwise would have been under supervision • Once other offenders learn of offenders being terminated early, they may pressure agents to offer the same programming, which potentially could interfere with the capacity needed to provide the requisite dosage to the pool of 150; likewise with defendants at sentencing asking the court to specify dosage probation programming as a condition of probation 					
Strategies to Address Barriers:	<ul style="list-style-type: none"> • Seek alternate grant funding for agent training, program evaluation, program upgrades • Devise in-house training and evaluation capacity • Communication strategy and collaboration commitment in CJC by-laws and Policy Team Mission Statement are designed to build mutual support and counter backlash in the event of an exceptional result • Offenders eager for Dosage Probation but not selected for pilot project, and their counsel, will be informed of the experimental nature of the project, but data will be collected to help measure enthusiasm for this sentencing option 					
Objective 2:	Offenders in the target sample will be revoked 50% less frequently than the offenders in the prospective sample who were not selected for dosage treatment					
		Dates that Action Steps are Undertaken and Completed	Lead Person	Others Responsible	Resource Needs	Partner Coordination
Action Step 1:	See Action Steps 1-4 under Objective 1					
Action Step 2:	Determine cost of revocation, number and rate of	September 15, 2011 to December	Roberta Gaither Mike	Dosage Pro Team	DOC data Subject Matter Expert	DOC

	revocations for rules violations (as opposed to new charges); retain an accountant if necessary	1, 2011	Williams		Contractor	
Action Step 3:	Determine average and marginal costs of probation revocation; retain an accountant if necessary	September 15, 2011 to December 1, 2011	Roberta Gaither Mike Williams	Dosage Pro Team	DOC data Subject Matter Expert Contractor	DOC
Action Step 4:	See Action Steps 7-19 under Objective 1					
Action Step 5:	For any offenders in pool of 300 who are revoked, DOC reports: <ul style="list-style-type: none"> • Date of revocation • Revocation charges • Whether revocation was stipulated or ordered by an ALJ • Additional incarceration ordered as a result of revocation 	March 15, 2012 to September 1, 2016	Roberta Gaither Mike Williams	Dosage Pro Team	DOC data	DOC
Action Step 6:	See Action Steps 20-23 under Objective 1					
Potential Barriers:	• See Potential Barriers under Objective 1					
Strategies to Address Barriers:	• See Strategies under Objective 1					
Objective 3:	Offenders in the target sample will be charged with new offenses 50% less frequently than offenders in the prospective sample who were not selected for dosage treatment					
		Dates that Action Steps are Undertaken and Completed	Lead Person	Others Responsible	Resource Needs	Partner Coordination
Action Step 1:	See Action Steps 1-4 under Objective 1					

Action Step 2:	Determine baseline recidivism rate (<i>i.e.</i> , new charges, as opposed to misconduct that results in rules violation but not new charges) for probationers who fit criteria established in Action Step 7 under Objective 1	September 15, 2011 to December 1, 2011	Judge Sankovitz Roberta Gaither Mike Williams	Dosage Pro Team	DOC data CCAP data	DOC CCAP
Action Step 3:	See Action Steps 7-19 under Objective 1					
Action Step 4:	Dosage Pro team tracks all offenders in the pool of 300 on CCAP to see if offender is charged anew	March 15, 2012 to September 1, 2016	Judge Sankovitz	Dosage Pro Team	DOC data CCAP data Staff time	DOC
Action Step 5:	See Action Steps 20-23 under Objective 1					
Potential Barriers:	<ul style="list-style-type: none"> • See Potential Barriers under Objective 1 • DOC does not track new charges issued against offenders under its supervision, unless they result in revocation and a sentence served in a state prison, because not all agencies (including courts and county jail records administrators) use the same "unique primary identifier" DOC uses to connect data to particular offenders 					
Strategies to Address Barriers:	<ul style="list-style-type: none"> • See Strategies under Objective 1 • Manually track offenders in CCAP
